

FINAL LAB PRESENTATION
EVALUATION FORM
CHE382 CHEMICAL ENGINEERING LABORATORY

TEAM #: 1 TUES AM LAB EXPERIMENT: Liquid Extraction

COMMENTS:

1. Organization

Time management- A bit short at 8 ½ minutes, speak more slowly and add more discussion points.

2. Presentation Delivery

Good eye contact, voice level good for all speakers

3. Visual Aids

Slides are generally good with good use of space

4. Content

Objective good, Introduction and industry apps good.

Principles/theory: Satisfactory, add more on ternary equilibrium and Kremser equation since you used it in your analysis.

Experimental: Satisfactory, but add more on titration procedure.

Results: Good, but be consistent between theory and results (X_a/Y_a)

Analysis/Discussion: Good but expand on what caused the difficulty in performing the efficiency analysis

Summary: Good

Presentation Grade: (100 points max): 90/100
