Hello colleagues,

I revised our Program Educational Objectives to align with the new ChE and COE mission statements. I used the MIE and ECE PEO's as a reference with different category titles.

**Please review by this Thursday, 5/21 and let me know if you approve or have any comments/edits.**

I will be sending it out to our External Advisory Board and alumni list on Friday for their review.

**Chemical Engineering Mission Statement**

“The mission of the Department of Chemical Engineering is to deliver an outstanding and accessible education to a diverse student body. We prepare skilled engineers to advance both fundamental and applied research, drive innovation, and lead the development of transformative technologies that enhance economic mobility and contribute to local and global prosperity”.

**NEW Chemical Engineering Program Educational Objectives (Draft)**

| PEO | Category                 | Description                                                                                                                                                                                                                                               |
|-----|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1   | Professional Impact      | Effectively apply fundamental principles, scientific and engineering knowledge, problem-solving, critical thinking, and creative design in professional engineering practice and non-engineering fields such as law, medicine, education and business.    |
| 2   | Professional Practice    | Contribute effectively to industry, academia, government and entrepreneurial ventures to develop innovative solutions that address societal and technical challenges locally and globally, thus contributing to economic growth and upward mobility.      |
| 3   | Service and Leadership   | Practice engineering with clear communication, leadership, teamwork, and high standards of integrity, ethical responsibility, safety and protection of the environment, thereby creating a collaborative, diverse and inclusive culture in the workplace. |
| 4   | Professional Development | Enhance skills and knowledge through graduate education, professional development courses, self-directed research, and on-the-job training and experience.                                                                                                |

**Chemical Engineering Program Educational Objectives (Current)**

| PEO | Category | Description                                                                                                                             |
|-----|----------|-----------------------------------------------------------------------------------------------------------------------------------------|
| 1   | Depth    | In engineering practice, advanced study or original research, UIC Chemical Engineering bachelor's degree graduates will be effective in |

|   |                                   |                                                                                                                                                                                                                                                                                                              |
|---|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   |                                   | applying fundamental principles, scientific knowledge, rigorous analysis, creative design, and conceptual innovation.                                                                                                                                                                                        |
| 2 | Breadth                           | Based upon mastery of engineering in a broad, societal context, UIC Chemical Engineering graduates will have successful careers in the public or private sectors, or in the pursuit of graduate education.                                                                                                   |
| 3 | Professionalism and Service       | In the service of industry, government, the engineering profession and society at large, graduates will function effectively in the complex modern work environment with clear communication, responsible teamwork, and high standards of ethics, professionalism, safety and protection of the environment. |
| 4 | Life-Long Learning and Leadership | Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will enhance their skills and knowledge through life-long learning and demonstrate professional leadership.                                                                                      |

Thanks for your help on this.

**Subject:** Please review by Thursday 5/21- Chemical Engineering Program Educational Objectives (PEO's)

Hello colleagues,

I revised our Program Educational Objectives to align with the new ChE and COE mission statements.

I used the MIE and ECE PEO's as a reference with different category titles.

**Please review by this Thursday, 5/21 and let me know if you approve or have any comments/edits.**

I will be sending it out to our External Advisory Board and alumni list on Friday for their review.

**Chemical Engineering Mission Statement**

“The mission of the Department of Chemical Engineering is to deliver an outstanding and accessible education to a diverse student body. We prepare skilled engineers to advance both fundamental and applied research, drive innovation, and lead the development of transformative technologies that enhance economic mobility and contribute to local and global prosperity”.

**NEW Chemical Engineering Program Educational Objectives (Draft)**

| PEO | Category               | Description                                                                                                                                                                                                                               |
|-----|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1   | Professional Impact    | Apply fundamental principles, scientific and engineering knowledge, critical thinking, and creative design in professional engineering practice and non-engineering fields.                                                               |
| 2   | Professional Practice  | Contribute to industry, academia, government and entrepreneurial ventures and develop innovative solutions that address societal and technical challenges locally and globally, thus contributing to economic growth and upward mobility. |
| 3   | Service and Leadership | Practice engineering with high standards of integrity, ethical responsibility, safety and protection of the environment, thereby creating a                                                                                               |

|   |                          |                                                                                                                                                              |
|---|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   |                          | collaborative, diverse and inclusive culture in the workplace.                                                                                               |
| 4 | Professional Development | Reinforce skills and knowledge through graduate education, professional development courses, self-directed research, and on-the-job training and experience. |

#### Chemical Engineering Program Educational Objectives (Current)

| PEO | Category                          | Description                                                                                                                                                                                                                                                                                                  |
|-----|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1   | Depth                             | In engineering practice, advanced study or original research, UIC Chemical Engineering bachelor's degree graduates will be effective in applying fundamental principles, scientific knowledge, rigorous analysis, creative design, and conceptual innovation.                                                |
| 2   | Breadth                           | Based upon mastery of engineering in a broad, societal context, UIC Chemical Engineering graduates will have successful careers in the public or private sectors, or in the pursuit of graduate education.                                                                                                   |
| 3   | Professionalism and Service       | In the service of industry, government, the engineering profession and society at large, graduates will function effectively in the complex modern work environment with clear communication, responsible teamwork, and high standards of ethics, professionalism, safety and protection of the environment. |
| 4   | Life-Long Learning and Leadership | Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will enhance their skills and knowledge through life-long learning and demonstrate professional leadership.                                                                                      |

Thanks for your help on this.

Hi Alan,

The new draft of the educational objectives looks pretty good to me. I approve!

Thank you,  
Korosh

**Subject:** Please review by Thursday 5/21- Chemical Engineering Program Educational Objectives (PEO's)

Hello colleagues,

I revised our Program Educational Objectives to align with the new ChE and COE mission statements. I used the MIE and ECE PEO's as a reference with different category titles.

**Please review by this Thursday, 5/21 and let me know if you approve or have any comments/edits.**

I will be sending it out to our External Advisory Board and alumni list on Friday for their review.

**Chemical Engineering Mission Statement**

"The mission of the Department of Chemical Engineering is to deliver an outstanding and accessible education to a diverse student body. We prepare skilled engineers to advance both fundamental and applied research, drive innovation, and lead the development of transformative technologies that enhance economic mobility and contribute to local and global prosperity".

**NEW Chemical Engineering Program Educational Objectives (Draft)**

| PEO | Category               | Description                                                                                                                                                                                                                                            |
|-----|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1   | Professional Impact    | Effectively apply fundamental principles, scientific and engineering knowledge, problem-solving, critical thinking, and creative design in professional engineering practice and non-engineering fields such as law, medicine, education and business. |
| 2   | Professional Practice  | Contribute effectively to industry, academia, government and entrepreneurial ventures to develop innovative solutions that address societal and technical challenges locally and globally, thus contributing to economic growth and upward mobility.   |
| 3   | Service and Leadership | Practice engineering with clear communication, leadership, teamwork, and high standards of integrity, ethical responsibility, safety and                                                                                                               |

|   |                          |                                                                                                                                                            |
|---|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   |                          | protection of the environment, thereby creating a collaborative, diverse and inclusive culture in the workplace.                                           |
| 4 | Professional Development | Enhance skills and knowledge through graduate education, professional development courses, self-directed research, and on-the-job training and experience. |

We prepare skilled engineers to advance both fundamental and applied research, drive innovation, and lead the development of transformative technologies that enhance economic mobility and contribute to local and global prosperity”.

**NEW Chemical Engineering Program Educational Objectives (Draft)**

| PEO | Category            | Description                                                                                                             |
|-----|---------------------|-------------------------------------------------------------------------------------------------------------------------|
| 1   | Professional Impact | Effectively apply fundamental principles, scientific and engineering knowledge, problem-solving, critical thinking, and |

|   |                          |                                                                                                                                                                                                                                                           |
|---|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   |                          | creative design in professional engineering practice and non-engineering fields such as law, medicine, education and business.                                                                                                                            |
| 2 | Professional Practice    | Contribute effectively to industry, academia, government and entrepreneurial ventures to develop innovative solutions that address societal and technical challenges locally and globally, thus contributing to economic growth and upward mobility.      |
| 3 | Service and Leadership   | Practice engineering with clear communication, leadership, teamwork, and high standards of integrity, ethical responsibility, safety and protection of the environment, thereby creating a collaborative, diverse and inclusive culture in the workplace. |
| 4 | Professional Development | Enhance skills and knowledge through graduate education, professional development courses, self-directed research, and on-the-job training and experience.                                                                                                |

#### **Chemical Engineering Program Educational Objectives (Current)**

| <b>PEO</b> | <b>Category</b>                   | <b>Description</b>                                                                                                                                                                                                                                                                                           |
|------------|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1          | Depth                             | In engineering practice, advanced study or original research, UIC Chemical Engineering bachelor's degree graduates will be effective in applying fundamental principles, scientific knowledge, rigorous analysis, creative design, and conceptual innovation.                                                |
| 2          | Breadth                           | Based upon mastery of engineering in a broad, societal context, UIC Chemical Engineering graduates will have successful careers in the public or private sectors, or in the pursuit of graduate education.                                                                                                   |
| 3          | Professionalism and Service       | In the service of industry, government, the engineering profession and society at large, graduates will function effectively in the complex modern work environment with clear communication, responsible teamwork, and high standards of ethics, professionalism, safety and protection of the environment. |
| 4          | Life-Long Learning and Leadership | Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will enhance their skills and knowledge through life-long learning and demonstrate professional leadership.                                                                                      |

Thanks for your help on this.

Best,

Alan

Dr. Alan D Zdunek  
 Director of Undergraduate Studies  
 Clinical Associate Professor  
 University of Illinois at Chicago (UIC)  
 Department of Chemical Engineering (MC 110)  
 150 Engineering Innovation Building  
 929 W Taylor Street  
 Chicago, Illinois 60607
