

Spring 2025

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

- | | |
|----------|---|
| <u>4</u> | Ability to apply knowledge of mathematics, science and engineering. |
| <u>4</u> | Ability to design and conduct experiments, as well as to analyze and interpret data. |
| <u>3</u> | Ability to design a system, component, or process to meet desired needs. |
| <u>5</u> | Ability to function on multi-disciplinary teams. |
| <u>3</u> | Ability to identify, formulate, and solve engineering problems. |
| <u>5</u> | Understanding of professional and ethical responsibility. |
| <u>4</u> | Ability to communicate effectively. |
| <u>5</u> | Broad education necessary to understand the impact of engineering solutions in a global and societal context. |
| <u>4</u> | Recognition of the need for, and an ability to engage in life-long learning. |
| <u>3</u> | Knowledge of contemporary issues. |
| <u>4</u> | Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. |
| <u>4</u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

CHE 301 CHE 341
CHE 311
CHE 312
CHE 381
CHE 382

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

CHE 230

CHE 330

(4.) What courses/topics should we consider deleting or adding to the curriculum?

Add : CH433

Delete : ~~CH230~~ CHE 230

(5.) Do you have any additional comments or suggestions?

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

- | | |
|----------|---|
| <u>5</u> | Ability to apply knowledge of mathematics, science and engineering. |
| <u>5</u> | Ability to design and conduct experiments, as well as to analyze and interpret data. |
| <u>5</u> | Ability to design a system, component, or process to meet desired needs. |
| <u>5</u> | Ability to function on multi-disciplinary teams. |
| <u>5</u> | Ability to identify, formulate, and solve engineering problems. |
| <u>4</u> | Understanding of professional and ethical responsibility. |
| <u>5</u> | Ability to communicate effectively. |
| <u>5</u> | Broad education necessary to understand the impact of engineering solutions in a global and societal context. |
| <u>5</u> | Recognition of the need for, and an ability to engage in life-long learning. |
| <u>4</u> | Knowledge of contemporary issues. |
| <u>4</u> | Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. |
| <u>5</u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

Process Control

Process Design & Simulation with ASPEN plus

Thermodynamics

Senior Design

Senior Seminar

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

Organic Chemistry II

Physical Chemistry I

(4.) What courses/topics should we consider deleting or adding to the curriculum?

→ (Question 3 answers)

(5.) Do you have any additional comments or suggestions?

Incorporate industry speakers in classes

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

<u>4</u>	Ability to apply knowledge of mathematics, science and engineering.
<u>5</u>	Ability to design and conduct experiments, as well as to analyze and interpret data.
<u>5</u>	Ability to design a system, component, or process to meet desired needs.
<u>5</u>	Ability to function on multi-disciplinary teams.
<u>4</u>	Ability to identify, formulate, and solve engineering problems.
<u>5</u>	Understanding of professional and ethical responsibility.
<u>5</u>	Ability to communicate effectively.
<u>3</u>	Broad education necessary to understand the impact of engineering solutions in a global and societal context.
<u>5</u>	Recognition of the need for, and an ability to engage in life-long learning.
<u>5</u>	Knowledge of contemporary issues.
<u>5</u>	Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
<u>4</u>	Overall, do you feel that your undergraduate degree prepared you for your career?

(2.) Which courses or topics were the most interesting or useful?

CHE 313, 210, 301, 381/382, 396/397, 341, 433

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

CHEM 342, CHEM 222, CHEM 234, CHE 230

(4.) What courses/topics should we consider deleting or adding to the curriculum?

Get rid of CHE 230, keep CME 260. Make CHE 433 a requirement for everyone

(5.) Do you have any additional comments or suggestions?

No

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

- | | |
|----------|---|
| <u>5</u> | Ability to apply knowledge of mathematics, science and engineering. |
| <u>5</u> | Ability to design and conduct experiments, as well as to analyze and interpret data. |
| <u>5</u> | Ability to design a system, component, or process to meet desired needs. |
| <u>5</u> | Ability to function on multi-disciplinary teams. |
| <u>5</u> | Ability to identify, formulate, and solve engineering problems. |
| <u>4</u> | Understanding of professional and ethical responsibility. |
| <u>4</u> | Ability to communicate effectively. |
| <u>4</u> | Broad education necessary to understand the impact of engineering solutions in a global and societal context. |
| <u>5</u> | Recognition of the need for, and an ability to engage in life-long learning. |

| <u>4</u> | Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. |
| <u>5</u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

CHE 210, 311, 311, 381/382

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

CHE 205, 230, 330

(4.) What courses/topics should we consider deleting or adding to the curriculum?

CHE 230/330 cover the same material

CHEM 234 is unnecessary

(5.) Do you have any additional comments or suggestions?

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

- | | |
|----------|---|
| <u>5</u> | Ability to apply knowledge of mathematics, science and engineering. |
| <u>5</u> | Ability to design and conduct experiments, as well as to analyze and interpret data. |
| <u>4</u> | Ability to design a system, component, or process to meet desired needs. |
| <u>5</u> | Ability to function on multi-disciplinary teams. |
| <u>5</u> | Ability to identify, formulate, and solve engineering problems. |
| <u>5</u> | Understanding of professional and ethical responsibility. |
| <u>5</u> | Ability to communicate effectively. |
| <u>5</u> | Broad education necessary to understand the impact of engineering solutions in a global and societal context. |
| <u>5</u> | Recognition of the need for, and an ability to engage in life-long learning. |
| <u>5</u> | Knowledge of contemporary issues. |
| <u>4</u> | Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. |
| <u>5</u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

CHE 201, CHE 205, CHE 210, and CHE 313 were the most interesting and useful classes in my opinion. Each class taught us the fundamentals of chemical engineering. They weren't too difficult to understand and material is crucial for understanding for our future.

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

Outside of the CHE classes, I think that Organic Chemistry II is the least useful. I don't think the material after Organic Chemistry I is beneficial to our learning.

(4.) What courses/topics should we consider deleting or adding to the curriculum?

As I previously stated, I don't think that Organic Chemistry II is crucial for our curriculum. I think that introducing another ECE course would benefit us more.

(5.) Do you have any additional comments or suggestions?

Not currently. Thank you to all my professors and UIC for providing me with a great education!

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

- | | |
|----------|---|
| <u>5</u> | Ability to apply knowledge of mathematics, science and engineering. |
| <u>4</u> | Ability to design and conduct experiments, as well as to analyze and interpret data. |

| <u>4</u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

CHE 301, 341, 381

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

CHEM 234, CHE 260 - both interesting but not too useful

↳ similar to CHE 330 initially

(4.) What courses/topics should we consider deleting or adding to the curriculum?

CHEM 234 - deleting

(5.) Do you have any additional comments or suggestions?

N/A

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

- | | |
|----------|---|
| <u>5</u> | Ability to apply knowledge of mathematics, science and engineering. |
| <u>5</u> | Ability to design and conduct experiments, as well as to analyze and interpret data. |

(2.) Which courses or topics were the most interesting or useful?

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

- AChem

(4.) What courses/topics should we consider deleting or adding to the curriculum?

- Combine 230/330
- Don't need Orgo II

(5.) Do you have any additional comments or suggestions?

- AChem should be taken sooner to learn lab techniques

| <u>3</u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

	<u>Use full</u>	<u>why</u>
CHE 301	+ Dr. C. : Thermo	Thorough thorough & challenging
CHE 433	+ Dr. C. : Aspen	thorough
CHE 341	+ Dr. C. : Process control	thorough
CHE 396 & 397	: Senior Design	overview of industry
CHE 381 & 382	: Unit ops	many hands on

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

CHE 330 All Gen eds

(4.) What courses/topics should we consider deleting or adding to the curriculum?

N/A

(5.) Do you have any additional comments or suggestions?

N/A

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

- | | |
|----------|---|
| <u>5</u> | Ability to apply knowledge of mathematics, science and engineering. |
| <u>5</u> | Ability to design and conduct experiments, as well as to analyze and interpret data. |
| <u>4</u> | Ability to design a system, component, or process to meet desired needs. |
| <u>5</u> | Ability to function on multi-disciplinary teams. |
| <u>4</u> | Ability to identify, formulate, and solve engineering problems. |
| <u>5</u> | Understanding of professional and ethical responsibility. |
| <u>5</u> | Ability to communicate effectively. |
| <u>5</u> | Broad education necessary to understand the impact of engineering solutions in a global and societal context. |
| <u>5</u> | Recognition of the need for, and an ability to engage in life-long learning. |
| <u>3</u> | Knowledge of contemporary issues. |
| <u>4</u> | Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. |
| <u>5</u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

CHE 205, 210, 341, 386/392, 381/382, 311/12/13/21
CHEM 232/233

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

CHEM 234, CHE 230/330, CS 109

(4.) What courses/topics should we consider deleting or adding to the curriculum?

Delete CHEM 234 and CS 109

↳ does not add any value to the curriculum unless you're premed or want to do research

CS 109 → I think the chemE department can do a much better job at teaching python or C or C++ or C# etc

(5.) Do you have any additional comments or suggestions?

I'd suggest start getting the students comfortable with group projects early on. Through my internships I found out that industry requires team work skills and interpersonal skills to be successful so getting the students engaged in ^{more} team work is a good idea. Maybe the 201 project could be assigned earlier in the semester to allow the students to develop good relationship with their peers. I would also incentivize students to take leadership in their projects.

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

- | | |
|---------------|---|
| <u>4</u> | Ability to apply knowledge of mathematics, science and engineering. |
| <u>4</u> | Ability to design and conduct experiments, as well as to analyze and interpret data. |
| <u>3</u> | Ability to design a system, component, or process to meet desired needs. |
| <u>4</u> | Ability to function on multi-disciplinary teams. |
| <u>4</u> | Ability to identify, formulate, and solve engineering problems. |
| <u>4</u> | Understanding of professional and ethical responsibility. |
| <u>4</u> | Ability to communicate effectively. |
| <u>4</u> | Broad education necessary to understand the impact of engineering solutions in a global and societal context. |
| <u>5</u> | Recognition of the need for, and an ability to engage in life-long learning. |
| <u>3</u> | Knowledge of contemporary issues. |
| <u>4</u> | Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. |
| <u> </u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

CHE 205 - VBA is a strong crossover skill, it is important to understand numerical methods because we solve numerically often
CHE 433 - Simulation is an important skill. I like the topic
CHE 341 - It is important to understand how physical equipment work

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

CHE 330 - The topics were interesting but I don't know how much I would actually use

(4.) What courses/topics should we consider deleting or adding to the curriculum?

CHE 230 or CHE 260 - there is too much overlap in the curricula. Change 230 so that there is less overlap or choose 1

(5.) Do you have any additional comments or suggestions?

Talk to the chemistry department about the PChem requisite. You don't need analytical chemistry for that class and although it's a 300 level course, it pairs well with 201 or 301.

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

Organic Chemistry 1 & 2 , ECE 210 , CME 260

(4.) What courses/topics should we consider deleting or adding to the curriculum?

Deleting Organic Chemistry 2

(5.) Do you have any additional comments or suggestions?

None.

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

- | | |
|----------|---|
| <u>4</u> | Ability to apply knowledge of mathematics, science and engineering. |
| <u>4</u> | Ability to design and conduct experiments, as well as to analyze and interpret data. |
| <u>5</u> | Ability to design a system, component, or process to meet desired needs. |
| <u>4</u> | Ability to function on multi-disciplinary teams. |
| <u>5</u> | Ability to identify, formulate, and solve engineering problems. |
| <u>5</u> | Understanding of professional and ethical responsibility. |
| <u>5</u> | Ability to communicate effectively. |
| <u>4</u> | Broad education necessary to understand the impact of engineering solutions in a global and societal context. |
| <u>4</u> | Recognition of the need for, and an ability to engage in life-long learning. |
| <u>4</u> | Knowledge of contemporary issues. |
| <u>5</u> | Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. |
| <u>5</u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

CHE 301

CHE 210

CHE 396/397

CHE 341

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

CHE330

CHE222

(4.) What courses/topics should we consider deleting or adding to the curriculum?

CHE330

(5.) Do you have any additional comments or suggestions?

N/A

SENIOR EXIT SURVEY

| <u>4</u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

312 was the most useful. I used alot of the material from that class in my internship.

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

321 and 230 or 330

321 was weird bc all the HW or examples with python

But ~~the~~ exams were all done by hand.

230 is like (me260) same with 330 but in polymers

(4.) What courses/topics should we consider deleting or adding to the curriculum?

add aspen to the undergraduate curriculum and get

rid of 230 or 330. the make ^{seminar} lab go with

311 - 313 to apply theory in lab with hands on experience.

(5.) Do you have any additional comments or suggestions?

have better advisors. if you don't get 1 of the 3 advisors its going a rough experience.

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program. Thank you!

<u>3</u>	Knowledge of contemporary issues.
<u>4</u>	Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
<u>4</u>	Overall, do you feel that your undergraduate degree prepared you for your career?

(2.) Which courses or topics were the most interesting or useful?

*Separation or Transport phenomena III was most interesting
&
Aspen plus simulation was most useful in terms of getting
calculations for Mass & Energy balances for Senior Design
Project*

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

Least useful was Transport phenomena I & II when compared to other courses but still went over very important topics like math techniques & vocabulary. but most analysis not revisited b/c of simulation & software.

(4.) What courses/topics should we consider deleting or adding to the curriculum?

Addition of Solids handling & rxns as an elective would be nice to give some more background for those in a degree to go in that industrial application

(5.) Do you have any additional comments or suggestions?

I felt that the education was well rounded & covered many topics.

SENIOR EXIT SURVEY

| <u>3</u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

I feel the most interesting courses were thermodynamics as well as the chemical engineering laboratories I feel they were the most hands on experiences. 494 was also very useful to give a different perspective in food science, mainly as someone interested in applying Chemical Eng. in the food industry.

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

The least interesting or useful were transport phenomena III. I feel III was not useful at all for the curriculum, just more difficult material.

(4.) What courses/topics should we consider deleting or adding to the curriculum?

Physical Chemistry should be considered deleting ~~as well as~~ since it was rushed, professor gave exams not related to class. Consider adding more classes related to food, or economical/business area of chemical engineering. That gives the opportunity for us to get exposure to more areas of Chemical Eng.

(5.) Do you have any additional comments or suggestions?

I think that if professors are going to make Aspen such an important part, then make it a required course. Right now is just an elective, but it puts so much pressure into the students that haven't taken it, such as in process control, or senior design. Do not make it such a big thing into the next classes.

PCHEM - Repeat of what we already ~~all~~ learned at a slower level

311, 312, 321 - Had issues with how these courses were taught
(really struggled until changed prof)

330, CHEM 222

(4.) What courses/topics should we consider deleting or adding to the curriculum?

330 and PCHEM and CHEM 222

(5.) Do you have any additional comments or suggestions?

—

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

<u>5</u>	Ability to apply knowledge of mathematics, science and engineering.
<u>4</u>	Ability to design and conduct experiments, as well as to analyze and interpret data.
<u>5</u>	Ability to design a system, component, or process to meet desired needs.
<u>5</u>	Ability to function on multi-disciplinary teams.
<u>4</u>	Ability to identify, formulate, and solve engineering problems.
<u>5</u>	Understanding of professional and ethical responsibility.
<u>5</u>	Ability to communicate effectively.
<u>4</u>	Broad education necessary to understand the impact of engineering solutions in a global and societal context.
<u>5</u>	Recognition of the need for, and an ability to engage in life-long learning.
<u>4</u>	Knowledge of contemporary issues.
<u>4</u>	Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
<u>5</u>	Overall, do you feel that your undergraduate degree prepared you for your career?

(2.) Which courses or topics were the most interesting or useful?

Process Design and Simulation with Aspen Plus.

Senior Design

Unit Operations Lab

Material and Energy Balances

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

CHE230 - feels very redundant, with 99% of content recycled from CHE330.

Physical Chemistry I - very redundant with CHE201 and CHE301

CHEM 222

(4.) What courses/topics should we consider deleting or adding to the curriculum?

CHE230

CHEM341

CHEM 222

(5.) Do you have any additional comments or suggestions?

~~Fixing~~

Would be nice to have more space for students to study - the library and lounge get pretty crowded.

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

- | | |
|----------|---|
| <u>4</u> | Ability to apply knowledge of mathematics, science and engineering. |
| <u>4</u> | Ability to design and conduct experiments, as well as to analyze and interpret data. |
| <u>4</u> | Ability to design a system, component, or process to meet desired needs. |

(2.) Which courses or topics were the most interesting or useful?

Aspen was pretty useful since we had to learn industry-applicable knowledge such as temperature cross in a cooling tower or common unit specifications.

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

Che 330. Did not find it applicable, ~~and~~ personally Pchem II is more relevant to Engineers.

(4.) What courses/topics should we consider deleting or adding to the curriculum?

Che 330. Shouldn't be one of 2 required courses.

(5.) Do you have any additional comments or suggestions?

I wonder about the value of my ~~own~~ degree knowing that my classmates have cheated in and nearly failed all of their courses and getting the same degree as I.

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

- | | |
|----------|---|
| <u>3</u> | Ability to apply knowledge of mathematics, science and engineering. |
| <u>3</u> | Ability to design and conduct experiments, as well as to analyze and interpret data. |
| <u>3</u> | Ability to design a system, component, or process to meet desired needs. |
| <u>3</u> | Ability to function on multi-disciplinary teams. |
| <u>4</u> | Ability to identify, formulate, and solve engineering problems. |
| <u>4</u> | Understanding of professional and ethical responsibility. |
| <u>5</u> | Ability to communicate effectively. |
| <u>3</u> | Broad education necessary to understand the impact of engineering solutions in a global and societal context. |
| <u>3</u> | Recognition of the need for, and an ability to engage in life-long learning. |
| <u>4</u> | Knowledge of contemporary issues. |
| <u>4</u> | Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. |
| <u>5</u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

CHE 321 was interesting it provided in-depth look at various types of chemical reactors and their real world applications.

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

CHE 230, because it's a similar course to CME 260
~~but~~ so it's not interesting but it is useful

(4.) What courses/topics should we consider deleting or adding to the curriculum?

CHE 230, should be deleted, because it seems like a repeat.

(5.) Do you have any additional comments or suggestions?

Coursework could be more focused on helping students understand rather than give us exams that only few people can do it

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

- | | |

| <u>5</u> | Knowledge of contemporary issues. |
| <u>5</u> | Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. |
| <u>5</u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

I enjoyed the unit ops labs &
transport phenomenon course,

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

I think every course was useful
and taught me either study methods
or material

(4.) What courses/topics should we consider deleting or adding to the curriculum?

I think the polymers course could be
expanded on a bit.

(5.) Do you have any additional comments or suggestions?

N/A

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

- | | |
|----------|---|
| <u>5</u> | Ability to apply knowledge of mathematics, science and engineering. |
| <u>5</u> | Ability to design and conduct experiments, as well as to analyze and interpret data. |
| <u>3</u> | Ability to design a system, component, or process to meet desired needs. |
| <u>5</u> | Ability to function on multi-disciplinary teams. |
| <u>4</u> | Ability to identify, formulate, and solve engineering problems. |

| <u>5</u> | Knowledge of contemporary issues. |
| <u>5</u> | Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice. |
| <u>4</u> | Overall, do you feel that your undergraduate degree prepared you for your career? |

(2.) Which courses or topics were the most interesting or useful?

The most interesting courses were CHE 311, CHE 313, CHE 381, and CHE 382. I found CHE 381 and 382 especially useful due to the applicability of the various CHE courses in a hands on manner and understanding what all the math we've learned really means.

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

The least interesting courses were CHE 230 just because all the material I had already learned in CHE 230.

(4.) What courses/topics should we consider deleting or adding to the curriculum?

Definitely deleting CHE 230 because about 90% of the course was content/ power points that are used in CHE 330. During the duration of the class I felt like I really wasn't learning as I had taken CHE 330 already and everything was just a repetition of the previous semester.

(5.) Do you have any additional comments or suggestions?

Hopefully in the near future a technical elective that focuses on petroleum and oil engineering is incorporated.

SENIOR EXIT SURVEY

As a senior student, we would like you to complete this self-assessment survey and to provide feedback for improvement of our curriculum for the ongoing ABET accreditation of our chemical engineering program,. Thank you!

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

<u>4</u>	Ability to apply knowledge of mathematics, science and engineering.
<u>4</u>	Ability to design and conduct experiments, as well as to analyze and interpret data.
<u>4</u>	Ability to design a system, component, or process to meet desired needs.
<u>4</u>	Ability to function on multi-disciplinary teams.
<u>4</u>	Ability to identify, formulate, and solve engineering problems.

(1.) Based upon your experiences as a Chemical Engineering student at UIC, please rate your skills in the following categories, using the following criteria:
(5 = Excellent, 4 = Strong, 3 = Moderate, 2 = Weak, 1 = Poor)

<u>5</u>	Ability to apply knowledge of mathematics, science and engineering.
<u>5</u>	Ability to design and conduct experiments, as well as to analyze and interpret data.
<u>4.5</u>	Ability to design a system, component, or process to meet desired needs.
<u>3</u>	Ability to function on multi-disciplinary teams.
<u>5</u>	Ability to identify, formulate, and solve engineering problems.
<u>3</u>	Understanding of professional and ethical responsibility.
<u>3</u>	Ability to communicate effectively.
<u>4</u>	Broad education necessary to understand the impact of engineering solutions in a global and societal context.
<u>4</u>	Recognition of the need for, and an ability to engage in life-long learning.
<u>4</u>	Knowledge of contemporary issues.
<u>5</u>	Ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
<u>4</u>	Overall, do you feel that your undergraduate degree prepared you for your career?

(2.) Which courses or topics were the most interesting or useful?

Interesting: Transport II, Transport III; Unit Operations Labs I & II; Reaction Engineering
Useful: ChE 205? (The Microsoft excel learning class), ChE 210 Mass/Energy Balances

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

Least interesting: Thermodynamics (CHE calculator for everything, should be another method or tool available)

CHE 230: Teaching style is always reading off slides, students do not attend

(4.) What courses/topics should we consider deleting or adding to the curriculum?

CHE Related:

More writing courses, with regards to writing technical / lab reports.

Make Aspen required as its required for process control.

Not CHE Related:

Another year of organic lab (Organic lab II)

(5.) Do you have any additional comments or suggestions?

Group work with current seniors have been horrible. They do not communicate, do not do their work, and/or half-ass their work. This has been an issue since sophomore/ junior year as well since that's when group projects start to occur. I understand working as a team is important and is a skill but I feel most students that I have been involved in for projects do not care. My friends in other engineering majors have had the same issue.

<u>4</u>	Overall, do you feel that your undergraduate degree prepared you for your career?

(2.) Which courses or topics were the most interesting or useful?

CHE 313 (Transport Phenomena 3), CHE 433 (Aspen simulation), Chem eng lab 1 & 2, CHE 341 (Process control)

Flip over for Questions #3-#5

(3.) Which courses or topics were the least interesting or useful?

CHE 230/330

(4.) What courses/topics should we consider deleting or adding to the curriculum?

Delete CHE 230

(5.) Do you have any additional comments or suggestions?

I would advise merging CHE 230 and 330 together into one class and add a different class that is more viable to the department. Possibly add a coding class in python? I also believe that CHE 433 (Aspen simulation) should be a required class. Aspen was extremely helpful for senior design and many engineers have stated that knowing how to use the simulation is valuable for industry.
