

CHE 453 – Fundamentals of Electrochemistry Project Presentation

You are asked to conduct a critical review of a journal article and deliver a presentation to the class on **November 21, 2004**. For the 15-minute presentation, here's a suggested time balance:

1. Introduction (2 minutes)
 - Briefly introduce the article (title, author, publication)
 - State the main topic and purpose of the article
 - Provide a concise overview of your critical assessment
2. Summary of the Article (3-4 minutes)
 - Outline the key points and main arguments
 - Highlight the methodology used (if applicable)
 - Briefly mention the main findings or conclusions
3. Critical Analysis (7-8 minutes)

This is the core of your presentation and should receive the most time:

 - Evaluate the strengths and weaknesses of the article
 - Discuss the validity of the methodology and results
 - Assess the author's arguments and use of evidence
 - Consider how the article contributes to the field
4. Conclusion (2 minutes)
 - Summarize your overall assessment
 - Restate the most important strengths and limitations
 - Offer any final thoughts or recommendations

Presentation Grading Rubric

1. Content (45 points):

Introduction (10 points):

- Clear statement of article title, author, and publication (2 points)
- Concise explanation of main topic and purpose (4 points)
- Brief overview of critical assessment (4 points)

Summary of the Article (15 points):

- Accurate outline of key points and main arguments (5 points)
- Clear explanation of methodology used (5 points)
- Concise summary of main findings or conclusions (5 points)

Critical Analysis (15 points):

- Thorough evaluation of article strengths and weaknesses (4 points)
- Insightful assessment of methodology and results validity (4 points)
- In-depth analysis of author's arguments and use of evidence (4 points)
- Thoughtful discussion of article's contribution to the field (3 points)

Conclusion (5 points):

- Effective summary of overall assessment (2 points)
- Clear restatement of key strengths and limitations (2 points)
- Insightful final thoughts or recommendations (1 point)

2. Presentation Skills (25 points):

Organization and Structure (10 points):

- Logical flow of information (3 points)
- Adherence to suggested time balance (4 points)
- Smooth transitions between sections (3 points)

Delivery (10 points):

- Clear and audible speech (3 points)
- Appropriate pace and timing (3 points)
- Engaging presentation style (2 points)
- Effective use of eye contact and body language (2 points)

Slide Quality (5 points):

- Clear and relevant slides or other visual materials (2 points)
- Appropriate use of graphics, charts, or tables (2 points)
- Slides enhance rather than distract from the presentation (1 point)

3. Subject Knowledge (10 points):

- Demonstrates deep understanding of the article content (5 points)
- Shows familiarity with relevant electrochemistry concepts (5 points)

4. Question Handling (15 points):

Asking Questions (5 points):

Answering Questions (10 points):

- Provides clear and accurate responses to questions (4 points)
- Demonstrates ability to think on feet and apply knowledge (3 points)
- Handles challenging questions with poise and professionalism (3 points)

5. Time Management (5 points):

Completes presentation within the 15-minute time limit

Total: ____/100 points
