Good Morning,

This is the link to our test optional FAQs: https://admissions.uic.edu/undergraduate/requirements-deadlines/first-year-requirements/test-optional-faq

UIC is test optional and now also holds a no harm test score approach. Applicants do not select a testing plan to apply with, but they are welcome to submit test scores during the application process. If a test score is a helpful piece in the overall review, it will be used. If it is harmful, it will not be used in the review process.

Is this information sufficient?

HI Alan
Thanks for the nudge. @Lorkovich, Malinda K, are you able to provide a response to share with the Chemical Engineering evaluator, as they await our response? The team chairs have also requested to meet with Rose, so she will be meeting them during their in person visit at 2:30pm on Nov 16 to share about enrollment.

Dear Miiri and Malinda,

I am following up on my question below from our ABET program evaluator.
Can you provide a response on behalf of Enrollment Management that we can share with the Program Evaluator, or is there someone else that I should contact? Please advise.

Question from ABET evaluator:

"The University is stated to be test optional (SAT/ACT). How do you compare applicants that have taken the test to those who haven't?"

Best regards,

Alan

Dear Malinda,
The College of Engineering is undergoing reaccreditation with ABET. The Chemical Engineering department has contacted me with the following question from ABET.

The University is stated to be test optional (SAT/ACT). How do you compare applicants that have taken the test to those who haven't?

Can you provide a response on behalf of Enrollment Management that we can share with the Program Evaluator?

Thank you so much,
Miiri

Subject: ChE PEV Question- Admission related

Hello Miiri,

The ChE PEV, Gary Scott, emailed me with several questions, one that I need your help with:

1. The University is stated to be test optional (SAT/ACT). How do you compare applicants that have taken the test to those who haven't?

Here is the paragraph in our SSR that he is referring to:
Freshman students
The two primary factors used to determine the admissibility of a new freshman applying to the University of Illinois at Chicago are the high school percentile rank (HSPR) and the American College Test (ACT) composite score, if submitted. The University will also accept Scholarship Aptitude Test (SAT) scores, but SAT scores are converted to an ACT composite equivalent. UIC admission is now test-optional, and as such ACT/SAT scores are considered if submitted but are not required. Should an applicant submit more than one set of entrance exam scores, then the Office of Admissions will use the highest score when processing an application.

Please advise.

Thanks,

Alan
