PEO	Category	Description
1	**Professional Impact**	Apply fundamental principles, scientific and engineering knowledge, problem-solving, critical thinking, and creative design to drive tangible impact in chemical engineering practice and non-engineering fields such as law, medicine, education and business.
2	**Professional Practice**	Contribute to industry, academia, government and entrepreneurial ventures and develop sustainable innovations that address societal and technical challenges locally and globally, contributing to economic growth and upward mobility.
3	**Service and Leadership**	Practice engineering with clear communication, leadership, teamwork, and high standards of integrity, ethical responsibility, with focus on safety of

		human life and protection of the environment, thereby creating a collaborative, diverse and inclusive culture in the workplace.
4	**Professional Development**	Reinforce skills and knowledge through graduate education, professional development courses, self-directed research, and on-the-job training and experience.

Thanks again for your support.

Best,

Alan
