To Nere, Nandu <nnere2@uic.edu>

Good morning Dr. Nere,

Thank you so much for the highly insightful and informative class. I really loved it, especially as it was the only ChemE class I took, and I was happy to finally get to explore that interest.

Team Member Evaluation:

Bailin Feng

- Strength: Very educated and knowledgeable about drug product manufacturing and unit processes
Strength: Easy to reach, communicates well, responds to emails quickly
- Opportunity: Sometimes felt that he was explaining to me rather than us having a discussion
- Opportunity: Often connected class topics to his work in his lab, which is okay, but maybe learn/make connections with other applications

Omar Alrefae

- Not present, did not respond to communications

Best,
Maryam Abdul-Kader

Subject: CHE 494 Biopharma Process Dev. Mfg. (44673, 44674) 2026 Spring: Request for the Team feedback by Noon tomorrow!

Dear Students of CHE494,

Excellent job at presenting your team projects today! All the teams did great. Equally great was the engagement in Q/A.

Please send me an email with the team member evaluation- 2 strengths and 2 opportunities for improvement for YOUR team members (only) by noon tomorrow. It will be kept anonymous.

Thank you and wish you only the best!

Regards,
Nandu
