

CHEMICAL ENGINEERING EXPO 2025 ABET FEEDBACK

NAME: _____

☐ Faculty/UIC Judge ☐ UIC Alumni Judge ☐ Industry Judge

For the ongoing ABET accreditation of our chemical engineering program, we would like your feedback on our Program Education Objectives (PEO) as related to the Senior Design projects. PEO's are broad statements that describe the career and professional accomplishments that the program is preparing our graduates to achieve approximately 3-5 years after earning their bachelor's degree.

Please comment below. You may make additions, omissions, changes to any specific aspects.

Thank you!

CHEMICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

1. In engineering practice, advanced study or original research, UIC Chemical Engineering bachelor's degree graduates will be effective in applying fundamental principles, scientific knowledge, rigorous analysis, creative design, and conceptual innovation.
2. Based upon mastery of engineering in a broad societal context, UIC Chemical Engineering graduates will have successful careers in public or private sectors, or in pursuit of graduate education.
3. In the service of industry, government, the engineering profession and society at large, graduates will function effectively in the complex modern work environment with clear communication, responsible teamwork, and high standards of ethics, professionalism, safety and protection of the environment.
4. Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will enhance their skills and knowledge through life-long learning and demonstrate professional leadership.

COMMENTS:

judging even rubrics / take of it - communication skills
→ frame of reference for cost.
→ maintain cost
→ Microsoft (professional presentation) → standardize all the equipment
Power point CAD software draw.io
→ Some posters were too much information.
→ Difficulty points /
3 levels → level 1, 2, 3.
→ Green plant, sustainability.
→ PFD divided into 4 → hard to follow.
→ Fairly good job w/ economics Capex / Opex
carbon intake emissions / sustainability.
→ Aspen capital cost estimator, don't use man. *sensitivity of it*
do by hand. *only tax credit*
→ capital cost for equipment, vs all plant.

*Simulation is late.
size of exchanger
or size of column.*

CHEMICAL ENGINEERING EXPO 2025 ABET FEEDBACK

NAME: Tricia Gillenwater

☐ Faculty/UIC Judge ☐ UIC Alumni Judge ☒ Industry Judge

For the ongoing ABET accreditation of our chemical engineering program, we would like your feedback on our Program Education Objectives (PEO) as related to the Senior Design projects. PEO's are broad statements that describe the career and professional accomplishments that the program is preparing our graduates to achieve approximately 3-5 years after earning their bachelor's degree.

Please comment below. You may make additions, omissions, changes to any specific aspects.

Thank you!

CHEMICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

1. In engineering practice, advanced study or original research, UIC Chemical Engineering bachelor's degree graduates will be effective in applying fundamental principles, scientific knowledge, rigorous analysis, ^{and} creative design, ~~and conceptual innovation.~~ *is redundant*
2. Based upon mastery of engineering in a broad societal context, UIC Chemical Engineering graduates will have successful careers in public or private sectors, or in pursuit of graduate education.
3. In the service of industry, government, the engineering profession and society at large, graduates will function effectively in the complex modern work environment with clear communication, responsible teamwork, and high standards of ethics, professionalism, safety and protection of the environment.
4. Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will ^{be inspired to} enhance their skills and knowledge through life-long learning and demonstrate professional leadership.

COMMENTS:

Although it's good to focus 3-5 years after graduation, most companies would expect these skills and abilities on Day 1 of hire. Waiting 3 to 5 years to develop these is too long, companies want results from their new hires in 6 months ~~max~~ or less.

CHEMICAL ENGINEERING EXPO 2025 ABET FEEDBACK

NAME: Jeffrey Zalc

☐ Faculty/UIC Judge ☐ UIC Alumni Judge ☒ Industry Judge

For the ongoing ABET accreditation of our chemical engineering program, we would like your feedback on our Program Education Objectives (PEO) as related to the Senior Design projects. PEO's are broad statements that describe the career and professional accomplishments that the program is preparing our graduates to achieve approximately 3-5 years after earning their bachelor's degree.

4. Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will enhance their skills and knowledge through life-long learning and demonstrate professional leadership.

COMMENTS:

All four teams (1,2,3,4) I worked with were very professional. I was impressed by the scope of work done in just a few months, covering context, design/control, profitability analysis, and recommendations. Even when the economics did not look very good, the students had good ideas about how to improve the process. All students seemed very knowledgeable and well-spoken. The only (minor) comment would be to have more of the economic assumptions shown on the posters. Handing out brochures (with QR codes) was very smart!

CHEMICAL ENGINEERING EXPO 2025 ABET FEEDBACK

4. Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will enhance their skills and knowledge through life-long learning and demonstrate professional leadership.

COMMENTS:

- 1) ENCOURAGE TEAMS TO MEET WITH MENTORS IN A TIMELY MANNER AT THE START OF EACH PROJECT "PHASE", WHEN 4 WKS ARE AVAILABLE, MEETING 1 1/2 WEEKS BEFORE PRESENTATIONS CAN LIMIT THE IMPACT OF OUR INPUT.
- 2) MORE EDUCATION IS NEEDED IN THE AREA OF REAL WORLD EQUIPMENT SIZING E.G. WE ALWAYS SEE OUTRAGEOUSLY LARGE DISTILLATION COLUMNS FROM TURNING UP THE REFLUX IN ASPEN PLUS TO HIT PRODUCT SPECS, BUT NOT CHECKING TO SEE THE IMPACT ON DIAMETER, OR BLINDLY PRESENTING IT AS FEASIBLE.

↳ OVER

CHEMICAL ENGINEERING EXPO 2025 ABET FEEDBACK

NAME: Victor Nieto

☐ Faculty/UIC Judge ☒ UIC Alumni Judge ☒ Industry Judge

For the ongoing ABET accreditation of our chemical engineering program, we would like your feedback on our Program Education Objectives (PEO) as related to the Senior Design projects. 4. Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will enhance their skills and knowledge through life-long learning and demonstrate professional leadership.

COMMENTS: Based off of the presentations seen, it is
evident the chemical engineering students have the
fundamentals necessary for engineering. As an Alumnus
with roughly three years of industry experience I believe
I have met the educational objectives meant to be done 3-5 years
post graduation. The students were well prepared and it
was evident that they have bright futures ahead of them
in Chemical Engineering.

4. Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will enhance their skills and knowledge through life-long learning and demonstrate professional leadership.

COMMENTS:

The required deliverables for the senior design course comprise nearly all that I would want in hiring a recent graduate. However, some of the guidance in the textbook is out of sync with industry standards (e.g. % contingency, % O&M). I would recommend, but not require, some familiarity with renewables profiles, Power-to-X modeling, & optimization of a green plant running on a variable power source in the next few years. I think the number of presentations required is perfect.

CHEMICAL ENGINEERING EXPO 2025 ABET FEEDBACK

NAME: Basit Owoseni

☐ Faculty/UIC Judge ☒ UIC Alumni Judge ☐ Industry Judge

4. Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will enhance their skills and knowledge through life-long learning and demonstrate professional leadership.

COMMENTS:

1. Engineering practices with its incorporation of computer technology is becoming more alarming as AI develops across industries. UIC should consider encouraging students to use AI tools to improve research and understanding.
2. Students need to believe and understand the value added from furthering their education especially as the job market demands experience more than a Masters /PhD
4. Dr. C approach to not assigning textbooks for his classes was very played a big part in my confidence to seek more information outside the classroom. I think that strategy helped influence my dedication to lifelong learning.

4. Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will enhance their skills and knowledge through life-long learning and demonstrate professional leadership.

COMMENTS:

PEOs and what I observed show that UIC students will make successful process engineers. Simulation and design, along with the economics and safety, are critical to process engineering. Being a former student, I believe simulation in Aspen Plus or HYSYS should be mandatory as a core ChemE course also.

4. Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will enhance their skills and knowledge through life-long learning and demonstrate professional leadership.

COMMENTS:

I participate in the Sr Design Class as a mentor and believe the capstone class is an accurate simulation of the work a Process Development engineer does in any industrial setting. The course syllabus includes all aspects: evaluation of competition, Safety, Environment, Control, Process Flow development & Simulation, and process economics. Student performance in the class has improved every year and is currently at a high standard.

CHEMICAL ENGINEERING EXPO 2025 ABET FEEDBACK

NAME: PATRICK SHANNON

☐ Faculty/UIC Judge ☐ UIC Alumni Judge ☒ Industry Judge

For the ongoing ABET accreditation of our chemical engineering program, we would like your feedback on our Program Education Objectives (PEO) as related to the Senior Design projects. 4. Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will enhance their skills and knowledge through life-long learning and demonstrate professional leadership.

COMMENTS:

all presentations discussed goal, process, safety / Environ / economics
Posters were all done well. Good economic discussions by all.
Comment: • crowded & compact. I would suggest a larger hall
it was hard to hear the group from all the noise.
• It was very organized w/ score cards and time allotted.
• I would be interested in coming back next year if possible.
• I think the groups as a whole could have talked more about
the process & its equipment. Suggest focus one piece in more detail.
