CHE Student Climate Survey

Start of Block: Default Question Block

Q3 You are invited to participate in the UIC Chemical Engineering (CHE) Climate Survey. This survey was created in consultation with the UIC Office of Diversity. The survey will take approximately 10 minutes to complete. The survey was created to better understand whether students of the CHE community feel included in and engaged in the department.

It represents a core initiative of the CHE Diversity, Recruitment and Retention Committee. As part of our commitment to accountability, we are conducting this survey to ensure that we hear from all members of the CHE community. We'll use the information we get from the survey to improve our programs and services so that we can provide a more equitable and inclusive climate.

Your participation in this survey is voluntary. If you choose, you can start the survey and stop at any time. The information collected will be kept absolutely confidential. General results from the survey will be analyzed by the CHE Diversity Committee and shared with the CHE community. Absolutely no references to your individual responses will be made in any written or oral reports.
