- Faculty open office hours posted more widely
- Department "open house" at the start of each semester to foster sense of community and allow introductions to labs/research
- Advertising resource links on website better (check under "undergraduate student resources") listed there is: Counseling center, disability resource center, engineering career center, GPIP, Makerspace, etc.
    - Maybe announce it during Engineering 100, like a website tour
- Department highlights of recently published papers, prelims, defenses, and graduations
    - How do we get students to submit information independently?
- Text blasts for department events?
- Host events throughout the day instead of after since so many students are commuters
    - Coffee Breaks with pastries for everyone rotating faculty host but encourage all faculty to attend
    - Finals week coffee hours
- Update lab websites to current years with current students
- Happy hour
- A better register of when defenses/graduations are happening to be able to announce and post about them
- Repeat in curriculum when taking concurrently CHE 301 & PCHEM 1, proposed taking grad level themodynamics in place of pchem
- RA & TA appointments
- Buddy system – Mentorship program
- Grad Student Professional Development:
    - Grad student seminar presentations
    - CV, presentation, publication, thesis preparation workshops
- Talk to other CHE departments to see what works for them in their undergrad & grad programs.
- Open Senior seminars to under classmen
- More events during "working hours" since we are commuter school many students find it difficult to stay late.
    - CV writing, negotiating salary, networking, research opportunities
    - Maybe offer during Tuesdays 11 am-2 pm
