Alan,
I do not have any documentation. You may claim that the instructor of record, Prof. GAP of Chemistry, granted Saleha Hashimi an override and allowed her to register for the course. The instructors of record can waive prerequisites.
This is the end of the story.
George

Subject: Re: Question about Pre-requisite exception for CHEM 342

Hello LaShonda,

We have our ABET accreditation review this fall semester, and the ABET Chemical Engineering program evaluator contacted me after reviewing the transcript of one of our chemical engineering students, Saleha Hashim, 673744087. This is part of the accreditation review.

Saleha took CHEM 342 in Fall 2025 but did not have the necessary pre-requisite for this course, PHYS 142.

Since PHYS 142 is a pre-requisite for CHEM 342, the evaluator is asking whether there is any documentation that allowed the student to take CHEM 342 without the PHYS 142 prerequisite that your department requires for this course.

Can you check if there is any documentation or any correspondence with the student that describes why the Chemistry department made an exception to the PHYS 142 pre-requisite?

Thanks again for your help.

Best regards,

Alan
