2. OPEN ENDED QUESTIONS

2.1) Please comment on specific characteristics of the course that were most beneficial to you:

- I really enjoyed the discussion based structure of the class, it made for much more engaging lectures.

2.2) Please comment on specific aspects of the course that need improvement:

- Certain instructions seemed unclear at times in terms of the expectations of assignments.
- I think the course work needs some work so that it is more engaging to students. At times it was hard to follow and begin to see the bigger picture

2. OPEN ENDED QUESTIONS

2.1) Please comment on specific characteristics of the course that were most beneficial to you:

- As an undergrad, a beneficial aspect of this class was the journal club. Most of our classes whole focus are equations and problem solving and very few have a literature reading component. Before taking this class, I would perhaps read 1 or 2 research papers per semester but this class strengthen my scientific literature reading skills by having us read a paper per week and really understand it in order to present it to the class. The literature review and research proposal also strengthen my research, reading, and presentation skills. I don't think many classes in our engineering curriculum are tailored for individuals who are interested in research and taking this class would be beneficial for someone who is interested in going to grad school.

2.2) Please comment on specific aspects of the course that need improvement:

- One way to improve this class would be to increase student involvement in lecture as a way to make sure we are following the content. The professor did implement this in a few lectures but in other instances she would talk for extended periods of time leaving me without time to ask questions or a knowledge check

2. OPEN ENDED QUESTIONS

2.1) Please comment on specific characteristics of the course that were most beneficial to you:

- Dr. Singh and Dr. Nere are both very knowledgeable in the course and are a great beacon of help to understand the very difficult concepts and theories that are introduced or expanded upon in the class. Dr. Nere is very patient with our class as well I feel like our class in particular makes it hard for him to be able to give us valuable lessons from the lectures if we were to ask more questions.

2.2) Please comment on specific aspects of the course that need improvement:

- I believe this class is good and well taught.

2. OPEN ENDED QUESTIONS

2.1) Please comment on specific characteristics of the course that were most beneficial to you:

- I liked all of the guest lecturers, and class "field trips". It was fun to learn about the different resources available to students (mHub), and to actually see the professor give a pitch.
  I enjoyed this class, the professor is both very knowledgable in the subject and passionate about teaching the students.
