It's pretty good. I'm not sure if I will have a successful career or go back to school as that is not my decision alone to make (I.e. I don't decide if I get hired or not), but I won't stop until I am successful, that I can guarantee.

Nothing to add.

...

in life long learning you could add something about creating a home for life with connections. To create a sense of how tight the uic che community is on campus and out in the real world. thats just something minor

No comments

!

Don't make CHEM234 a required course.

I understand these Program Educational Objectives and believe that the UIC Chemical Engineering Program has done an exceptional job at preparing me to follow through on these objectives as I begin my engineering career.
