

Iman Abdelrazeq

(Attempt 2 of 2)

Test Information

QUESTION 1: CALCULATED NUMERIC

10

out of 10 points

Calculate the temperature of the stream **S8**. Express your answer in **°C** and round your numerical result into **a single decimal digit**.

Given Answer: 252.2

Correct Answer: 252.2

Answer range +/- 0.5 (251.7 - 252.7)

QUESTION 2: CALCULATED NUMERIC

10

out of 10 points

Calculate the steam flow to the Open Feed Water Heater. Express your answer in **kmol/s** and round your numerical result into **a single decimal digit**.

Given Answer: 6.8

Correct Answer: 6.9

Answer range +/- 0.2 (6.7 - 7.1)

QUESTION 3: CALCULATED NUMERIC

10

out of 10 points

Calculate the coal consumption for the cycle. Express your answer in **kg/s** and round your numerical result into **a single decimal digit**.

Given Answer: 107.8

Correct Answer:  107.9

Answer range +/- 0.5 (107.4 - 108.4)

QUESTION 4: CALCULATED NUMERIC

10

out of 10 points

Calculate the thermal efficiency of the cycle. Express your answer in % and round your numerical result into **a single decimal digit**.

Given Answer:  38.4

Correct Answer:  38.3

Answer range +/- 0.5 (37.8 - 38.8)

QUESTION 5: CALCULATED NUMERIC

0

out of 10 points

Calculate the quality of the LP turbine steam discharge. Express your answer as fraction and round your numerical result into **three decimal digits**.

Given Answer:  0.997

Correct Answer:  0.977

Answer range +/- 0.002 (0.975 - 0.979)

QUESTION 6: CALCULATED NUMERIC**10****out of 10 points**

Calculate the thermodynamic efficiency of the cycle. Express your answer in % and round your numerical result into a single decimal digit.

Given Answer: ✓ 50.6

Correct Answer: ✓ 50.6

Answer range +/- 0.5 (50.1 - 51.1)

QUESTION 7: CALCULATED NUMERIC**10****out of 10 points**

Calculate the amount of steam loss from the cycle. Express your answer in KMTA and round your numerical result into a single decimal digit.

KMTA: kilometric tonnes per annum [1 tonne = 1000 kg, 1 annum = 8000 hrs]

Given Answer: ✓ 35.4

Correct Answer: ✓ 35.8

Answer range +/- 0.5 (35.3 - 36.3)

QUESTION 8: CALCULATED NUMERIC**10****out of 10 points**

Calculate the lost work in the Open Feed Water Heater. Express your answer in MW and round your numerical result into a single decimal digit,

Given Answer: ✓ 35.3

Correct Answer: ✓ 35.4

Answer range +/- 0.5 (34.9 - 35.9)

QUESTION 9: CALCULATED NUMERIC

10

out of 10 points

Calculate the amount of steam required for production of 750 MW of power from the two turbines. Express your answer in **kmol/s** and round your numerical result into **a single decimal digit**,

Given Answer:  34.3

Correct Answer:  34.4

Answer range +/- 0.5 (33.9 - 34.9)

QUESTION 10: CALCULATED NUMERIC

10

out of 10 points

Calculate the temperature rise across the Feed Water Pump.
Express your answer in **Kelvin** and round your numerical result
into **a single decimal digit**.

Given Answer: 5.1

Correct Answer:  5.1

Answer range +/- 0.1 (5.0 - 5.2)
