All of these sounds pretty strong! :)

Keep up the great job modernizing the UIC Chemical Engineering department.

N/A

N/A

na

Impressive upgrade

It was such a pleasure to be a part such a talented professors in chemical engineering department.

#4 may want to emphasize continuing education

NA

I ended up working in various industries: chemical manufacturing, automotive, and nuclear (for the government) doing various engineering roles. I distinctly remember the ChE department stressing that a ChemE degree would While, I did not go on an engineering centered career path. My education and skills hone by UIC ChemE Department were helpful a useful in the business/sales path I did pursue by allowing me to breakdown problems

N/A

N/A

I think some of these statements would benefit from including the value of personal growth such as: learning wisdom from previous engineers, holding fast to objective truth, and being responsible when given power and

None

COE Mission Statement consider replacing 'upward mobility' with 'technological innovation'; PEO #3 considering replacing 'diverse and inclusive' with 'accountable and welcoming'; PEO #4 considering adding 'industry supported
