

Jan 26, 2026

Attendees: Ataei, Komperda, Kosmach, Kotche, Parde, Wang, Zdunek

Meeting Minutes

MAJOR TOPICS

1. CS 109
MIE wants at least a small MATLAB unit as well as include Python in CS 109 course. Natalie will bring this info back to CS department.
2. Banner-enforced prereqs checks FYI reminder to depts
3. Dept data reports/analysis FYI Jessica will begin to prepare ABET program data
4. Artificial Intelligence Concentration in the Computer Science Major EPC approved. Miiri to notify Dana's office.
5. ENGR 100 to 1 credit hour for letter grade? Issues with ENGR 101 taken for FYF bc ENGR 100 is full. Issues with peer mentors who are teaching ENGR 100. CHE 100, ME/IE 100 in development, BME 101 exists, CME 197 exists, ECE doesn't see course planning skill from ENGR 100 carried through, no depts have space to add a credit hour. Ongoing discussion. Resources removed for FESP leading departments to consider creating own course....
6. Office hours / syllabus policies in COE? With TA shortage, faculty are not giving any assessments, wondering if there should be a policy to have assessments before 10 week drop to be fair to student in addition to office hour. Committee believes it would be good to create a policy draft for faculty approval. See draft language below in blue. Comments?

1. Course Syllabi Requirement

1.1 Per campus policy, all regularly scheduled undergraduate, graduate and professional courses for which students receive credit or are required to complete, regardless of the method of delivery, must have a syllabus or equivalent documentation, defining the expectations of the instructor and the responsibilities of the student. <https://faculty.uic.edu/for-administrators/webguide-to-policies-procedures/teaching-policies/syllabi/>

1.2 The syllabus must be provided to students no later than the first scheduled class meeting or, for asynchronous courses, on or before the first day the course site opens.

1.3 Each syllabus must include content included on the College of Engineering template, which is ABET and HLC compliant. <https://uofi.box.com/s/reg2rt7gmu4uor32wfudp9qm3dmw435j>

1.4 Faculty must upload a copy of the syllabus to the designated departmental or institutional repository by the deadline established by the department or academic affairs office. (do all depts do this?)

2. Faculty Office Hours Requirement

2.1 Faculty are required to offer regular, posted office hours each week during the academic term for the purpose of meeting with students, providing academic assistance, and addressing course-related concerns.

2.2 Faculty must maintain a minimum of **[X] hours** of office hours per week for a standard 3 hour undergraduate course and **[X] hours** of office hours per week for a standard 4 hour graduate course. Deviations....? Or **[X] hours** per credit hour?

2.3 Office hours may be held in person, via synchronous virtual meetings, or a combination, but must be clearly communicated to students in the course syllabus and posted in a publicly accessible location (e.g., department website, learning management system). – Is this appropriate?

2.4 Faculty are expected to be fully available and responsive during posted office hours and to provide alternative meeting times as reasonably necessary to support student needs.

3. Course Assessments

3.1 Faculty are expected to complete, and return graded, either a major assessment or sufficiently many smaller performance evaluations, totaling at minimum 1/3 of the total course grade prior to the end of week 10 for a regular semester course. The grade, or a standing in the class (performance evaluation) must be available to the student no later than the Wednesday of Week 10, so that the student has sufficient time to determine the necessity to late drop the course. Failure to meet these deadlines, outside of extenuating circumstances, may result in disciplinary action, as determined by the unit head.

7. Progression in the major – catalog statement? <https://catalog.uic.edu/ucats/colleges-depts/engineering/>

Some DUS have raised concerns about the no repeat policy impacting student progression in the major. Need further conversations to clarify intent and repercussions of such policy created by #4 below.

Dismissal Rules

1. *A student on academic notice who does not meet the academic requirements will be dismissed from the university.*
2. *A student who fails to make progress toward a degree may be dismissed. Examples of failure to make progress include excessive term deficit points,^a failure to complete required courses, accumulation of excessive number of Incomplete (I) grades, failure to earn credit in any semester, and failure to maintain a 2.00 average in the major discipline.*

3. *A student may be readmitted after the first dismissal with a petition and presentation of above-satisfactory performance in college-level courses taken outside of UIC. The non-UIC work evaluated for readmission may or may not apply towards a UIC degree. However, only in rare cases, a student will be readmitted after the second dismissal.*
4. *PROPOSED: A student who fails to progress in their major may be dropped from the program and moved into Engineering Undecided in order to select another major. Examples include failure to earn credit towards the degree, adherence to the repeat policy, other things????*
 - *failure to pass required courses*
 - *accumulation of excessive Incompletes, Ds, Fs, and Ws*
 - *Accumulation of repeated courses (here we are referring to total number of repeats, not per course)*
 - *failure to maintain a 2.0 semester GPA*

**Miiri needs to let Salman know to have CRS routed to him, not Carmen*

CRS TOPICS

***400-500 level courses need to be approved by DGS committee first**

1. CS 101 – AI + Computing Basics *approved by EPC pending removal of all enrollment restrictions by major (GenEds should not have these) as well as updating course topics to reflect hours not weeks.*

For next meeting....

2. CS 109
3. IE 348
4. IE 365
5. IE 463*
6. ME 341
7. ME 380
8. ENGR 402* – *Carmen to verify contact hours, assessment methods, prereq of MENG student, change cross-list, approved pending these changes. Carmen will notify Miiri when changes are updated*
9. CS 544* – *has it been updated in CRS? approved by EPC, pending Natalie will check with instructor if they want to make CRS more broad/less detailed, also map assessments to learning outcomes*
10. CS 546* – *need to be approved by DGS*
11. CS 555* – *need to be approved by DGS*
12. CS 592* – *need to be approved by DGS*

Feb 9, 2026

Attendees: Ataei, Komperda, Kosmach, Kotche, Wang, Zdunek

Meeting Minutes

CRS TOPICS

***400-500 level courses need to be approved by DGS committee first**

Per Salman 2/9, CS 546, CS 555, CS 495, approved. IE 463 not required for DGS approval bc UG-only course.

1. IE 348 – MK update numbering of Major Topics, remove Graduate College registration, EPC unanimously approved
2. IE 365 EPC unanimously approved
3. IE 463* UG only class, EPC unanimously approved
4. ME 341 EPC unanimously approved
5. ME 380 EPC unanimously approved
6. CME 440* prereqs for UG modified, does not need DGS approval

TABLED: Items 7-14 below UNTIL NEXT CRS MEETING? Mar 9. (Miiri will be out that meeting and will need a volunteer to Chair the meeting, else will need to cancel).

7. BME 103
8. CS 544* – approved by EPC, pending Natalie will check with instructor if they want to make CRS more broad/less detailed, also map assessments to learning outcomes. 2/9/26 No update from CS
9. ENGR 402* - Modified to be MENG 490. Miiri verified changes and approved in CRS on 1/30/26
10. CS 101 – AI + Computing Basics approved by EPC pending removal of all enrollment restrictions by major (GenEds should not have these) as well as updating course topics to reflect hours not weeks. 2/9/26 No update from CS
11. CS 495* (was CS 592) tabled until CS present
12. CS 109 tabled until CS present
13. CS 546* tabled until CS present
14. CS 555* tabled until CS present

For next meeting....

MAJOR TOPICS

1. ENGR 100 Need to form taskforce to assess need for ENGR 100

2. Office hours / syllabus policies in COE? **Committee believes it would be good to create a policy draft for faculty approval. See draft language below in blue. Comments?**

1. Course Syllabi Requirement

1.1 Per campus policy, all regularly scheduled undergraduate, graduate and professional courses for which students receive credit or are required to complete, regardless of the method of delivery, must have a syllabus or equivalent documentation, defining the expectations of the instructor and the responsibilities of the student. <https://faculty.uic.edu/for-administrators/webguide-to-policies-procedures/teaching-policies/syllabi/>

1.2 The syllabus must be provided to students no later than the first scheduled class meeting or, for asynchronous courses, on or before the first day the course site opens.

1.3 Each syllabus must include content included on the College of Engineering template, which is ABET and HLC compliant. <https://uofi.box.com/s/reg2rt7gmu4uor32wfudp9qm3dmw435j>

1.4 Faculty must upload a copy of the syllabus to the designated departmental or institutional repository by the deadline established by the department or academic affairs office. (do all depts do this?)

2. Faculty Office Hours Requirement

2.1 Faculty are required to offer regular, posted office hours each week during the academic term for the purpose of meeting with students, providing academic assistance, and addressing course-related concerns.

2.2 Faculty must maintain a minimum of **[X] hours** of office hours per week for a standard 3 hour undergraduate course and **[X] hours** of office hours per week for a standard 4 hour graduate course. Deviations....? Or **[X] hours** per credit hour?

2.3 Office hours may be held in person, via synchronous virtual meetings, or a combination, but must be clearly communicated to students in the course syllabus and posted in a publicly accessible location (e.g., department website, learning management system). – Is this appropriate?

2.4 Faculty are expected to be fully available and responsive during posted office hours and to provide alternative meeting times as reasonably necessary to support student needs.

3. Course Assessments

3.1 Faculty are expected to complete, and return graded, either a major assessment or sufficiently many smaller performance evaluations, totaling at minimum 1/3 of the total course grade prior to the end of week 10 for a regular semester course. The grade, or a standing in the class (performance evaluation) must be available to the student no later than the Wednesday of Week 10, so that the

student has sufficient time to determine the necessity to late drop the course. Failure to meet these deadlines, outside of extenuating circumstances, may result in disciplinary action, as determined by the unit head.

3. Progression in the major – catalog statement? <https://catalog.uic.edu/ucats/colleges-depts/engineering/>

Some DUS have raised concerns about the no repeat policy impacting student progression in the major. Need further conversations to clarify intent and repercussions of such policy created by #4 below.

Dismissal Rules

1. A student on academic notice who does not meet the academic requirements will be dismissed from the university.
 2. A student who fails to make progress toward a degree may be dismissed. Examples of failure to make progress include excessive term deficit points,^a failure to complete required courses, accumulation of excessive number of Incomplete (I) grades, failure to earn credit in any semester, and failure to maintain a 2.00 average in the major discipline.
 3. A student may be readmitted after the first dismissal with a petition and presentation of above-satisfactory performance in college-level courses taken outside of UIC. The non-UIC work evaluated for readmission may or may not apply towards a UIC degree. However, only in rare cases, a student will be readmitted after the second dismissal.
 4. **PROPOSED:** A student who fails to progress in their major may be dropped from the program and moved into Engineering Undecided in order to select another major. Examples include failure to earn credit towards the degree, adherence to the repeat policy, other things???
- failure to pass required courses
 - accumulation of excessive Incompletes, Ds, Fs, and Ws
 - Accumulation of repeated courses (here we are referring to total number of repeats, not per course)
 - failure to maintain a 2.0 semester GPA

Feb 23, 2026

Attendees: Ataei, Komperda, Kotche, Kosmach, Parde, Wang, Zdunek

Meeting Minutes

MAJOR TOPICS

1. EPC workload / meeting frequency

- Course buyout for NTT research did not get applied. (non EPC related)
- Jon K – 190 hrs already by 2/23 for DUS for course release
- DUS will work asynch regarding proposal
- 2015 - \$2500 stipend
- 2016 - \$10k stipend
- Is there a union aspect to this?
- DUS structure in LAS?

2. Miiri out 3/9. Need volunteer to chair.

- Natalie P to chair

3. 4+1 BME

- a. Proposal to Establish the Joint Bachelor of Science in Biomedical Engineering / Master of Science in Bioinformatics
 - b. Proposal to Establish the Joint Bachelor of Science in Biomedical Engineering / Master of Science in Biomedical Engineering
 - c. Proposal to Establish the Joint Bachelor of Science in Biomedical Engineering / Master of Engineering
 - 400 level grad level courses – MIE is the only dept that has a policy to ensure grad credit hours is additional work, other departments have process but possibly not consistent.
 - Edit to “4 classes and 12 credit hours” in regular BME
 - Approved by EPC pending updated language specifying 3 credit hours of shared BS/MS courses applied to BS degree, although 4 hours applied to MS. Miiri to notify Dana of COE approval once Zhinan edits.
- Canvas migration (Simona) shared with DUS, Simona will schedule 30 min follow-up meeting

DID NOT GET TO THESE ITEMS ON 2/23

- ENGR 100: are depts creating similar versions? Improvements, is there still a need?
- Office hours / syllabus policies in COE? With TA shortage, faculty are not giving any assessments, wondering if there should be a policy to have assessments before 10 week drop to be fair to student in addition to office hour. Committee believes it would be good to create a policy draft for faculty approval. See draft language below in blue. Comments?

1. Course Syllabi Requirement

1.1 Per campus policy, all regularly scheduled undergraduate, graduate and professional courses for which students receive credit or are required to complete, regardless of the method of delivery, must have a syllabus or equivalent documentation, defining the expectations of the instructor and the responsibilities of the student. <https://faculty.uic.edu/for-administrators/webguide-to-policies-procedures/teaching-policies/syllabi/>

1.2 The syllabus must be provided to students no later than the first scheduled class meeting or, for asynchronous courses, on or before the first day the course site opens.

1.3 Each syllabus must include content included on the College of Engineering template, which is ABET and HLC compliant. <https://uofi.box.com/s/reg2rt7gmu4uor32wfudp9qm3dmw435j>

1.4 Faculty must upload a copy of the syllabus to the designated departmental or institutional repository by the deadline established by the department or academic affairs office. (do all depts do this?)

2. Faculty Office Hours Requirement

2.1 Faculty are required to offer regular, posted office hours each week during the academic term for the purpose of meeting with students, providing academic assistance, and addressing course-related concerns.

 - accumulation of excessive Incompletes, Ds, Fs, and Ws
 - Accumulation of repeated courses (here we are referring to total number of repeats, not per course)
 - failure to maintain a 2.0 semester GPA

For next meeting....

CRS TOPICS

***400-500 level courses need to be approved by DGS committee first**

1. CS 101 – AI + Computing Basics approved by EPC pending removal of all enrollment restrictions by major (GenEds should not have these) as well as updating course topics to reflect hours not weeks. 2/9/26 No update from CS. 2/23 Updates made in CRS, Miiri approved for COE

2. BME 103
3. CME 440* prereqs for UG modified, does not need DGS approval
4. CS 544* – has it been updated in CRS? approved by EPC, pending Natalie will check with instructor if they want to make CRS more broad/less detailed, also map assessments to learning outcomes
5. CS 546* –approved first by DGS 2/8
6. CS 555*- approved first by DGS 1/29
7. CS 495 (formerly 592)* - approved first by DGS 1/29
8. CS 109 – will not move forward at this time; MIE does not want to drop MATLAB

March 30, 2026

Attendees: Kosmach, Komperda, Kotche, Parde, Wang, Zdunek

Meeting Minutes

MAJOR TOPICS

1. Discussed DUS stipends; these have not been adjusted in years and should be adjusted for inflation. **DUS will prepare proposal.**
 - Course buyout for NTT research did not get applied. (non EPC related)
 - Jon K – 190 hrs already by 2/23 for DUS for course release
 - DUS will work asynch regarding proposal
 - 2015 - \$2500 stipend
 - 2016 - \$10k stipend
 - Is there a union aspect to this?
 - DUS structure in LAS?
2. Discussed potential ways to restructure to handle administrative burden; for instance, many other engineering programs at other universities (and even the math program at UIC) have Associate Head of Instruction roles in addition to DUS roles for specific degree programs. **See #1.**
3. ENGR 100: are depts creating similar versions? Improvements, is there still a need?
TAs selection is not supported by DUS.
MIE: If ENGR 100 goes away, dept will need 2 NTT
Massive scope creep in ENGR 100 that needs to be addressed
ENGR 100 teaching load – faculty engagement desired as part of course load
4. In order to delete this from our catalog, EPC needs to vote so it can go to SCEP:
<https://catalog.uic.edu/ucatalog/colleges-depts/engineering/addl-interdisciplinary-opps/>
<https://catalog.uic.edu/ucatalog/colleges-depts/engineering/cs/minor-it/>
We have not offered these minors for some time. EPC approved both. Miiri submitted request for International Studies minor deletion to Dana's office. Natalie will complete the paperwork request to have IT minor deleted and will be routed to Dana's office.
5. CRS revision to ME 341 **Committee agreed this is sufficient and acceptable.**
 - no change to the Type of Instruction (2 hours/week for 15 weeks of lecture and 3 hours/week for 15 weeks of Lab) and no change to the credit hours but reduced the hours of major topics from 75 to 55.
 - UIC contact/credit hour policy is that 2 credit hours of lecture = 30 hours of major topics and 1 credit hour of lab = a minimum of 30 hours of major topics.
 - In the past, the department used an even higher contact to credit hour ratio for labs. Instead of a 2:1 ratio (30 hours = 1 credit), you used 3:1 (45 hours = 1 credit). That is how

you had 75 hours of major topics (30 hours of lecture + 45 hours of lab). The department can, with the permission of the college, reduce the hours of lab from 45 to 30 and still follow the university's policy. But was that your intention (i.e., do you want to have students meet for less than 140 minutes per week for 15 weeks)?

6. 4+1 BME Revision - remove MENG courses as concentration area electives. **Voted to approve. Miiri notified Dana.**
7. **DID NOT GET TO DISCUSS** Office hours / syllabus policies in COE? **With TA shortage, faculty are not giving any assessments, wondering if there should be a policy to have assessments before 10 week drop to be fair to student in addition to office hour. Committee believes it would be good to create a policy draft for faculty approval. See draft language below in blue. Comments?**

1. Course Syllabi Requirement

1.1 Per campus policy, all regularly scheduled undergraduate, graduate and professional courses for which students receive credit or are required to complete, regardless of the method of delivery, must have a syllabus or equivalent documentation, defining the expectations of the instructor and the responsibilities of the student.

<https://faculty.uic.edu/for-administrators/webguide-to-policies-procedures/teaching-policies/syllabi/>

1.2 The syllabus must be provided to students no later than the first scheduled class meeting or, for asynchronous courses, on or before the first day the course site opens.

1.3 Each syllabus must include content included on the College of Engineering template, which is ABET and HLC compliant.

<https://uofi.box.com/s/reg2rt7gmu4uor32wfudp9qm3dmw435j>

1.4 Faculty must upload a copy of the syllabus to the designated departmental or institutional repository by the deadline established by the department or academic affairs office. (do all depts do this?)

2. Faculty Office Hours Requirement

2.1 Faculty are required to offer regular, posted office hours each week during the academic term for the purpose of meeting with students, providing academic assistance, and addressing course-related concerns.

2.2 Faculty must maintain a minimum of **[X] hours** of office hours per week for a standard 3 hour undergraduate course and **[X] hours** of office hours per week for a standard 4 hour graduate course. Deviations....? Or **[X] hours** per credit hour?

2.3 Office hours may be held in person, via synchronous virtual meetings, or a combination, but must be clearly communicated to students in the course syllabus and posted in a publicly accessible location (e.g., department website, learning management system). – Is this appropriate?

2.4 Faculty are expected to be fully available and responsive during posted office hours and to provide alternative meeting times as reasonably necessary to support student needs.

3. Course Assessments

3.1 Faculty are expected to complete, and return graded, either a major assessment or sufficiently many smaller performance evaluations, totaling at minimum 1/3 of the total

course grade prior to the end of week 10 for a regular semester course. The grade, or a standing in the class (performance evaluation) must be available to the student no later than the Wednesday of Week 10, so that the student has sufficient time to determine the necessity to late drop the course. Failure to meet these deadlines, outside of extenuating circumstances, may result in disciplinary action, as determined by the unit head.

7. **DID NOT GET TO DISCUSS** Progression in the major – catalog statement?

<https://catalog.uic.edu/ucatalog/colleges-depts/engineering/>

Some DUS have raised concerns about the no repeat policy impacting student progression in the major. Need further conversations to clarify intent and repercussions of such policy created by #4 below.

Dismissal Rules

1. A student on academic notice who does not meet the academic requirements will be dismissed from the university.
2. A student who fails to make progress toward a degree may be dismissed. Examples of failure to make progress include excessive term deficit points,^a failure to complete required courses, accumulation of excessive number of Incomplete (I) grades, failure to earn credit in any semester, and failure to maintain a 2.00 average in the major discipline.
3. A student may be readmitted after the first dismissal with a petition and presentation of above-satisfactory performance in college-level courses taken outside of UIC. The non-UIC work evaluated for readmission may or may not apply towards a UIC degree. However, only in rare cases, a student will be readmitted after the second dismissal.
4. **PROPOSED:** A student who fails to progress in their major may be dropped from the program and moved into Engineering Undecided in order to select another major. Examples include failure to earn credit towards the degree, adherence to the repeat policy, other things????
 - failure to pass required courses
 - accumulation of excessive Incompletes, Ds, Fs, and Ws
 - Accumulation of repeated courses (here we are referring to total number of repeats, not per course)
 - failure to maintain a 2.0 semester GPA

8. 4+1 programs: shared credit hours should be consistent across all programs in the college:

Natalie will confirm (1) CS is ok with conferring BS degrees in S26 and (2) separately for BS and MS as policy going forward. We discussed a College-wide policy as well to follow campus policy. We also discussed the issue below, that is being discussed with DGS.

Salman will discuss with DGS, see email in folder.

This is from ME 4+1 catalog, which was approved last year:

"Students accepted into the joint degree program will be able to take two 400-level (graduate) Mechanical Engineering courses, enrolled as graduate students, and receive 4 credit hours per course. The two 400-level ME courses will count towards 6 credit hours of technical electives at

the undergraduate level, thereby completing the 128-credit hours for the BSME degree. The two 400-level ME courses will also count towards 8 credit hours of 400-level coursework toward the MSME degree."

For next meeting....

Reminder: CRS TOPICS *400-500 level courses must be approved by DGS committee first

1. ME 462
 - Tabled until approval by MIE graduate committee.
2. CS 495 (formerly 592)* - Approved first by DGS 1/29.
 - Tabled to revisit again, pending that updates are made to learning outcomes (should be more general and less instruction-focused; think in terms of "the student will be able to....") and a graduate college restriction is added.
3. CS 415 – Prerequisites updated to match current CS course numbers; does not need DGS approval.
4. CS 487 – Prerequisites updated to match current CS course numbers; does not need DGS approval.

April 13, 2026

Attendees: Ataei, Komperda, Kosmach, Kotche, Parde, Wang, Zdunek

Meeting Minutes

Reminder: CRS TOPICS *400-500 level courses must be approved by DGS committee first

1. EPC will review/approve all 500-level CRS courses by email, since they have been approved by DGS and impact only grad students.
-

2. ME / IE 599 - Approved first by DGS at last meeting To be voted on via email, approved 4/14/26
 3. ME / IE 598- - Approved first by DGS at last meeting To be voted on via email, approved 4/14/26
 4. ME 547 -- Approved first by DGS at last meeting To be voted on via email, approved 4/14/26
-

5. CS 109 approved - voted (5 Yes, 1 No) pending update to reflect inclusion of Matlab in #7 Major Topics, approved in CRS 4/14/26
 6. CS 495 (formerly 592)* - Approved first by DGS 1/29. unanimously approved
 7. CS 415 – Prerequisites updated to match current CS course numbers; does not need DGS approval. unanimously approved
 8. CS 487 – Approved first by DGS 4/2 unanimously approved
 9. CS 507 – Approved first by DGS 4/2 unanimously approved
-

10. ME 462 Tabled until approval by MIE graduate committee.
 11. CS 101 Tabled
 12. BME 439 Tabled
-

13. 4+1 BME / MENG program approved – voted (3 Yes, 1 Abstain)

Significant Concerns noted:

- Negative impact on existing 4+1 programs at dept level
- 8 week online courses for full-time undergraduate students not advised
- MENG courses have not been approved in EPC for undergraduate curricula
- High risk of students signing up for 4+1 MENG to take online courses for undergrad degree CAEs, and then not pursuing MENG
- Structurally, how do students enroll in these courses? MENG courses currently available for registration do not reflect new MENG program courses. Does Extended Campus register their students differently?

For next meeting....

MAJOR TOPICS

1. 4+1 programs: shared credit hours should be consistent across all programs in the college:

Natalie will confirm (1) CS is ok with conferring BS degrees in S26 and (2) separately for BS and MS as policy going forward. We discussed a College-wide policy as well to follow campus policy. We also discussed the issue below, that is being discussed with DGS.

Salman will discuss with DGS, see email in folder.

This is from ME 4+1 catalog, which was approved last year:

"Students accepted into the joint degree program will be able to take two 400-level (graduate) Mechanical Engineering courses, enrolled as graduate students, and receive 4 credit hours per course. The two 400-level ME courses will count towards 6 credit hours of technical electives at the undergraduate level, thereby completing the 128-credit hours for the BSME degree. The two 400-level ME courses will also count towards 8 credit hours of 400-level coursework toward the MSME degree."

2. CS proposes reducing degree to 120 credit hours.
CS inquiring about CS-developed math courses
3. ENGR 100: are depts creating similar versions? Improvements, is there still a need?
TAs selection is not supported by DUS.
MIE: If ENGR 100 goes away, dept will need 2 NTT
Massive scope creep in ENGR 100 that needs to be addressed
ENGR 100 teaching load – faculty engagement desired as part of course load
4. In order to delete this from our catalog, EPC needs to vote so it can go to SCEP:
<https://catalog.uic.edu/ucatalog/colleges-depts/engineering/cs/minor-it/>

Natalie will complete the paperwork request to have IT minor deleted and will be routed to Dana's office.

5. Late drop requests for not meeting prerequisites must be submitted during the current term and DUS need to communicate this to the student. Requests cannot be submitted retroactively.
6. Office hours / syllabus policies in COE? With TA shortage, faculty are not giving any assessments, wondering if there should be a policy to have assessments before 10 week drop to be fair to student in addition to office hour. Committee believes it would be good to create a policy draft for faculty approval. See draft language below in blue. Comments?

1. Course Syllabi Requirement

1.1 Per campus policy, all regularly scheduled undergraduate, graduate and professional courses for which students receive credit or are required to complete, regardless of the method of delivery, must have a syllabus or equivalent documentation, defining the expectations of the instructor and the responsibilities of the student.

<https://faculty.uic.edu/for-administrators/webguide-to-policies-procedures/teaching-policies/syllabi/>

1.2 The syllabus must be provided to students no later than the first scheduled class meeting or, for asynchronous courses, on or before the first day the course site opens.

1.3 Each syllabus must include content included on the College of Engineering template, which is ABET and HLC compliant.

<https://uofi.box.com/s/reg2rt7gmu4uor32wfudp9qm3dmw435j>

1.4 Faculty must upload a copy of the syllabus to the designated departmental or institutional repository by the deadline established by the department or academic affairs office. (do all depts do this?)

2. Faculty Office Hours Requirement

2.1 Faculty are required to offer regular, posted office hours each week during the academic term for the purpose of meeting with students, providing academic assistance, and addressing course-related concerns.

2.2 Faculty must maintain a minimum of **[X] hours** of office hours per week for a standard 3 hour undergraduate course and **[X] hours** of office hours per week for a standard 4 hour graduate course. Deviations....? Or **[X] hours** per credit hour?

2.3 Office hours may be held in person, via synchronous virtual meetings, or a combination, but must be clearly communicated to students in the course syllabus and posted in a publicly accessible location (e.g., department website, learning management system). – Is this appropriate?

2.4 Faculty are expected to be fully available and responsive during posted office hours and to provide alternative meeting times as reasonably necessary to support student needs.

3. Course Assessments

3.1 Faculty are expected to complete, and return graded, either a major assessment or sufficiently many smaller performance evaluations, totaling at minimum 1/3 of the total course grade prior to the end of week 10 for a regular semester course. The grade, or a standing in the class (performance evaluation) must be available to the student no later than the Wednesday of Week 10, so that the student has sufficient time to determine the necessity to late drop the course. Failure to meet these deadlines, outside of extenuating circumstances, may result in disciplinary action, as determined by the unit head.

- 7.
8. Progression in the major – catalog statement? <https://catalog.uic.edu/ucat/colleges-depts/engineering/>

Some DUS have raised concerns about the no repeat policy impacting student progression in the major. Need further conversations to clarify intent and repercussions of such policy created by #4 below.

Dismissal Rules

1. A student on academic notice who does not meet the academic requirements will be dismissed from the university.
2. A student who fails to make progress toward a degree may be dismissed. Examples of failure to make progress include excessive term deficit points,^a failure to complete required courses, accumulation of excessive number of Incomplete (I) grades, failure to earn credit in any semester, and failure to maintain a 2.00 average in the major discipline.
3. A student may be readmitted after the first dismissal with a petition and presentation of above-satisfactory performance in college-level courses taken outside of UIC. The non-UIC work evaluated for readmission may or may not apply towards a UIC degree. However, only in rare cases, a student will be readmitted after the second dismissal.
4. **PROPOSED:** A student who fails to progress in their major may be dropped from the program and moved into Engineering Undecided in order to select another major. Examples include failure to earn credit towards the degree, adherence to the repeat policy, other things????
 - failure to pass required courses
 - accumulation of excessive Incompletes, Ds, Fs, and Ws
 - Accumulation of repeated courses (here we are referring to total number of repeats, not per course)
 - failure to maintain a 2.0 semester GPA

April 27, 2026

Attendees: Ataei, Komperda, Kosmach, Kotche, Parde, Wang, Zdunek

Meeting Minutes

MAJOR TOPICS

1. Request to reschedule last EPC meeting to either 5/14 after grades are due. Can you meet sometime in the morning and then go to lunch together (my treat)? Proposing 11-12pm meeting in person and lunch afterwards? **Please let me know if that can work.**
2. 4+1 programs: shared credit hours should be consistent across all programs in the college:
 - a) **DUS please fill out the table at the link below** with your department's process as a first step in proposing a college-level process
<https://uofi.box.com/s/1ogjvras1wy4pw5y595j20kvyo6ogj0z>
 - b) **Information below is also in discussion with DGS committee (email in 3/30 folder).**
This is from ME 4+1 catalog, which was approved last year, can use as a reference.
"Students accepted into the joint degree program will be able to take two 400-level (graduate) Mechanical Engineering courses, enrolled as graduate students, and receive 4 credit hours per course. The two 400-level ME courses will count towards 6 credit hours of technical electives at the undergraduate level, thereby completing the 128-credit hours for the BSME degree. The two 400-level ME courses will also count towards 8 credit hours of 400-level coursework toward the MSME degree."
3. CS proposed to delete IT minor, please vote by email if you support this, so it can go to SCEP: (file in 4/27 folder)
<https://catalog.uic.edu/ucatalog/colleges-depts/engineering/cs/minor-it/>
Voted via email 4/28/26 to approve deleting IT minor. (Parde, Wang, Kosmach, Zdunek) Miiri notified Dana.
4. Office hours / syllabus policy proposal by EPC: Feedback from our meeting was incorporated.
Please provide any additional proposed changes or respond to APPROVE. If approved, I will share with Admin Council (and Exec Committee?) for review.

1. Course Syllabi Requirement

1.1 Per campus policy, all regularly scheduled undergraduate, graduate and professional courses for which students receive credit or are required to complete, regardless of the method of delivery, must have a syllabus or equivalent documentation, defining the expectations of the instructor and the responsibilities of the student.

<https://faculty.uic.edu/for-administrators/webguide-to-policies-procedures/teaching-policies/syllabi/>

1.2 The syllabus must be provided to students no later than the first scheduled class meeting or, for asynchronous courses, on or before the first day the course site opens.

1.3 Each syllabus must include content included on the College of Engineering template, which is ABET and HLC compliant.

<https://uofi.box.com/s/reg2rt7gmu4uor32wfudp9qm3dmw435j>

1.4 Faculty must upload a copy of the syllabus to the designated departmental or institutional repository by the deadline established by the department.

2. Faculty Office Hours Requirement

2.1 Faculty are required to offer regular, posted office hours each week during the academic term for the purpose of meeting with students, providing academic assistance, and addressing course-related concerns.

2.2 Faculty who are assigned a teaching load in any given semester must maintain a minimum of **2 hours** of office hours per week.

(comments: Right now I hold 3 hours a week of office hours. If we say minimum of 2, I can just see everyone dropping down to 2 hours. Is this what we want? As Jon said, we are probably doing this for one faculty member but in the end this could impact all our students in a negative way.

2.3 Office hours may be held in person, via synchronous virtual meetings, or a combination, but must be clearly communicated to students in the course syllabus and posted in a publicly accessible location (e.g., department website, learning management system).

2.4 Faculty are expected to be fully available and responsive during posted office hours and to provide alternative meeting times as reasonably necessary to support student needs.

(comments: In Section 2.4 of the faculty office hours requirement, the statement "to provide alternative meeting times as reasonably necessary" is a bit vague—will students have access to this policy? If so, I could see potential for it to be abused (e.g., student X claims that faculty member Y must make themselves available according to student X's personal schedule).

(comments: 4.2.2: a set schedule is preferred to avoid "by email appointment only," which can be easily rejected or rescheduled. In addition, "*Failure to meet these deadlines, outside of extenuating circumstances, may result in disciplinary action, as determined by the unit head.*" Does this also apply to 4.1 and 4.2?

(comments: I do not support 1/3 by Wed of week 10 with everything graded. If I look at ECE115 as an example, we have 10% Lab, 15% homework and 25% E1, E2, and E3. E1 is given week 6, E2 is given week 10. There is no way we are going to grade E2 by Wednesday. So, now, our ECE115 students have on Wednesday of week 10:

- a. 40% of their lab grade at best = 4%
- b. 70% of their HW at best = 10%
- c. 25% for E1 – returned to students.
- d. 25% for E2 – not graded since it is taken week 10

- e. In summary, that is 39% assuming everything is working perfectly.
- f. If we have one hiccup, are we prepared to have students to have the ability to drop the course if these conditions are not met?
- g. Are the TA's going to be subject to disciplinary action if they do not grade on time. I almost always have TAs in this situation. It would seem rather strange if we as faculty can face disciplinary action and TAs can not.

3. Course Assessments

3.1 Faculty are expected to complete, and return graded, either a major assessment or sufficiently many smaller performance evaluations, totaling at minimum 1/3 of the total course grade prior to the end of week 10 for a regular semester course. The grade, or a standing in the class (performance evaluation) must be available to the student no later than the Wednesday of Week 10, so that the student has sufficient time to determine the necessity to late drop the course. Failure to meet these deadlines, outside of extenuating circumstances, may result in disciplinary action, as determined by the unit head.

5. ENGR 100

4/28 discussion:

- COE students need connection to dept
- Are small classes having impact?
- Compromise for larger classes in each dept?
- Need quality control that information regarding course planning, resources are up to date
- Student advisory board also noted concerns, desire for credit/letter-graded course

4/13 discussion:

- TAs selection is not supported by DUS.
- MIE: If ENGR 100 goes away, dept will need 2 NTT
- Massive scope creep in ENGR 100 that needs to be addressed
- ENGR 100 teaching load – faculty engagement desired as part of course load

- 6. Late drop requests for not meeting prerequisites must be submitted during the current term and DUS need to communicate this to the student. Requests cannot be submitted retroactively. **discussed**

- 7. Progression in the major – catalog statement? <https://catalog.uic.edu/ucat/colleges-depts/engineering/> **Discussed issues, need to continue this conversation in further depth.**

Dismissal Rules

1. A student on academic notice who does not meet the academic requirements will be dismissed from the university.
2. A student who fails to make progress toward a degree may be dismissed. Examples of failure to make progress include excessive term deficit points,^a failure to complete required courses, accumulation of excessive number of Incomplete (I) grades, failure to

earn credit in any semester, and failure to maintain a 2.00 average in the major discipline.

3. A student may be readmitted after the first dismissal with a petition and presentation of above-satisfactory performance in college-level courses taken outside of UIC. The non-UIC work evaluated for readmission may or may not apply towards a UIC degree. However, only in rare cases, a student will be readmitted after the second dismissal.

4. *PROPOSED: A student who fails to progress in their major may be dropped from the program and moved into Engineering Undecided in order to select another major. Examples include failure to earn credit towards the degree, adherence to the repeat policy, other things???? (in 2 semesters, haven't earned a semester's worth of courses towards their degree)*

- *failure to pass required courses*
- *accumulation of excessive Incompletes, Ds, Fs, and Ws*
- *Accumulation of repeated courses (here we are referring to total number of repeats, not per course)*
- *failure to maintain a 2.0 semester GPA*

8. Credit overload – need to propose a policy so that this is not done until open enrollment. This change will minimize student “selling” seats to others and minimize sections filling up too quickly with students who may not intend to be in the class. *Need to discuss in subsequent meeting.*

DRAFT

For next meeting....

Reminder: CRS TOPICS *400-500 level courses must be approved by DGS committee first

1. ME 599 - Approved first by DGS at last meeting *To be voted on via email*
2. ME / IE 598- - Approved first by DGS at last meeting *To be voted on via email*

3. ME 547 -- Approved first by DGS at last meeting **To be voted on via email**
-

4. ME 462 **Tabled until approval by MIE graduate committee.**
5. CS 101 **Tabled**
6. BME 439 **Tabled**

7. New concentration in Computer Science major: Gaming and Real-time Computing

8. CS department proposing MS Artificial Intelligence for Fall 2027

<https://docs.google.com/document/d/1CRjpvIYHHw3fDGFc8lvqKwoPrFoxPzcEybbMZbiVQQQ/edit?tab=t.0>

May 11, 2026

Attendance: Ataei, Kotche, Liz Marai, Besma Smida, Wang, Zdunek, Xinhua Zhang
(voting on behalf of depts: Ataei, Wang, Zdunek, Zhang)

Meeting Minutes

Reminder: CRS TOPICS *400-500 level courses must be approved by DGS committee first

1. CS 496: Approved by DGS **Approved by EPC**
2. CS 578: Approved by DGS **Approved by EPC**
3. CME 119 **Approved by EPC**
4. CME 322 **Approved by EPC**
5. CME 421 **Approved by EPC pending DGS committee approval, DGS approval 5/17**
6. CME 422 **Approved by EPC pending DGS committee approval, DGS approval 5/17**
7. CME 425 **Approved by EPC pending DGS committee approval, DGS approval 5/17**
8. CME 426 **Approved by EPC pending DGS committee approval, DGS approval 5/17**
9. CME 539 **Approved by EPC pending DGS committee approval, DGS approval 5/17**

10. ME 462 **Tabled until approval by MIE graduate committee and DGS**
11. CS 101 **Tabled**
12. CS 361 **Tabled**
13. BME 439 **Tabled**

14. 4+1 programs: shared credit hours should be consistent across all programs in the college:
MIE still missing info <https://uofi.box.com/s/1ogjvras1wy4pw5y595j20kvyo6ogi0z>
Next need college-level process proposal

15. New concentration in Computer Science major: Gaming and Real-time Computing
Approved 4 votes (Wang, Zdunek, Ataei, Zhang)

16. CS department proposing MS Artificial Intelligence for Fall 2027 (approved by DGS on 5/5)
<https://academicprograms.uic.edu/timeline/>
Approved 4 votes (Wang, Zdunek, Ataei, Zhang)

17. Proposal to Revise the Doctor of Philosophy in Electrical and Computer Engineering
Approved 4 votes (Wang, Zdunek, Ataei, Zhang)

For next meeting....

MAJOR TOPICS

- a) **Information below is also in discussion with DGS committee (email in 3/30 folder).**
This is from ME 4+1 catalog, which was approved last year, can use as a reference.

"Students accepted into the joint degree program will be able to take two 400-level (graduate) Mechanical Engineering courses, enrolled as graduate students, and receive 4 credit hours per course. The two 400-level ME courses will count towards 6 credit hours of technical electives at the undergraduate level, thereby completing the 128-credit hours for the BSME degree. The two 400-level ME courses will also count towards 8 credit hours of 400-level coursework toward the MSME degree."

4. Office hours / syllabus policy proposal by EPC: Feedback from our meeting was incorporated. Please provide any additional proposed changes or respond to APPROVE. If approved, I will share with Admin Council (and Exec Committee?) for review.

1. Course Syllabi Requirement

1.1 Per campus policy, all regularly scheduled undergraduate, graduate and professional courses for which students receive credit or are required to complete, regardless of the method of delivery, must have a syllabus or equivalent documentation, defining the expectations of the instructor and the responsibilities of the student.

<https://faculty.uic.edu/for-administrators/webguide-to-policies-procedures/teaching-policies/syllabi/>

1.2 The syllabus must be provided to students no later than the first scheduled class meeting or, for asynchronous courses, on or before the first day the course site opens.

1.3 Each syllabus must include content included on the College of Engineering template, which is ABET and HLC compliant.

<https://uofi.box.com/s/reg2rt7gmu4uor32wfudp9qm3dmw435j>

1.4 Faculty must upload a copy of the syllabus to the designated departmental or institutional repository by the deadline established by the department.

2. Faculty Office Hours Requirement

2.1 Faculty are required to offer regular, posted office hours each week during the academic term for the purpose of meeting with students, providing academic assistance, and addressing course-related concerns.

2.2 Faculty who are assigned a teaching load in any given semester must maintain a minimum of **2 hours** of office hours per week.

(comments: Right now I hold 3 hours a week of office hours. If we say minimum of 2, I can just see everyone dropping down to 2 hours. Is this what we want? As Jon said, we are probably doing this for one faculty member but in the end this could impact all our students in a negative way.

2.3 Office hours may be held in person, via synchronous virtual meetings, or a combination, but must be clearly communicated to students in the course syllabus and posted in a publicly accessible location (e.g., department website, learning management system).

2.4 Faculty are expected to be fully available and responsive during posted office hours and to provide alternative meeting times as reasonably necessary to support student needs.

(comments: In Section 2.4 of the faculty office hours requirement, the statement "to provide alternative meeting times as reasonably necessary" is a bit vague—will students have access to this policy? If so, I could see potential for it to be abused (e.g., student X claims that faculty member Y must make themselves available according to student X's personal schedule).

(comments: 4.2.2: a set schedule is preferred to avoid "by email appointment only," which can be easily rejected or rescheduled. In addition, *"Failure to meet these deadlines, outside of extenuating circumstances, may result in disciplinary action, as determined by the unit head."* Does this also apply to 4.1 and 4.2?

(comments: I do not support 1/3 by Wed of week 10 with everything graded. If I look at ECE115 as an example, we have 10% Lab, 15% homework and 25% E1, E2, and E3. E1 is given week 6, E2 is given week 10. There is no way we are going to grade E2 by Wednesday. So, now, our ECE115 students have on Wednesday of week 10:

- a. 40% of their lab grade at best = 4%
- b. 70% of their HW at best = 10%
- c. 25% for E1 – returned to students.
- d. 25% for E2 – not graded since it is taken week 10
- e. In summary, that is 39% assuming everything is working perfectly.
- f. If we have one hiccup, are we prepared to have students to have the ability to drop the course if these conditions are not met?
- g. Are the TA's going to be subject to disciplinary action if they do not grade on time. I almost always have TAs in this situation. It would seem rather strange if we as faculty can face disciplinary action and TAs can not.

3. Course Assessments

3.1 Faculty are expected to complete, and return graded, either a major assessment or sufficiently many smaller performance evaluations, totaling at minimum 1/3 of the total course grade prior to the end of week 10 for a regular semester course. The grade, or a standing in the class (performance evaluation) must be available to the student no later than the Wednesday of Week 10, so that the student has sufficient time to determine the necessity to late drop the course. Failure to meet these deadlines, outside of extenuating circumstances, may result in disciplinary action, as determined by the unit head.

5. ENGR 100

4/28 discussion:

- COE students need connection to dept
- Are small classes having impact?
- Compromise for larger classes in each dept?
- Need quality control that information regarding course planning, resources are up to date
- Student advisory board also noted concerns, desire for credit/letter-graded course

4/13 discussion:

- TAs selection is not supported by DUS.
- MIE: If ENGR 100 goes away, dept will need 2 NTT
- Massive scope creep in ENGR 100 that needs to be addressed
- ENGR 100 teaching load – faculty engagement desired as part of course load

7. Progression in the major – catalog statement? <https://catalog.uic.edu/ucatalog/colleges-depts/engineering/> Discussed issues, need to continue this conversation in further depth.

Dismissal Rules

1. A student on academic notice who does not meet the academic requirements will be dismissed from the university.
2. A student who fails to make progress toward a degree may be dismissed. Examples of failure to make progress include excessive term deficit points,^a failure to complete required courses, accumulation of excessive number of Incomplete (I) grades, failure to earn credit in any semester, and failure to maintain a 2.00 average in the major discipline.
3. A student may be readmitted after the first dismissal with a petition and presentation of above-satisfactory performance in college-level courses taken outside of UIC.  - accumulation of excessive Incompletes, Ds, Fs, and Ws
 - Accumulation of repeated courses (here we are referring to total number of repeats, not per course)
 - failure to maintain a 2.0 semester GPA

8. Credit overload – need to propose a policy so that this is not done until open enrollment. This change will minimize student “selling” seats to others and minimize sections filling up too quickly with students who may not intend to be in the class. Need to discuss in subsequent meeting.

EPC meeting #1 Fall 2025

Sept 8, 2025

Attendees: Ataei, Komperda, Kosmach, Kotche, Wang, Zdunek

Meeting Minutes

MAJOR TOPICS

- Joint degree program process proposal
 - BS degree can be conferred independent of MS as of Fall 2025; please communicate to your units. Deadline for Intent to Graduate is Friday 9/12, so joint degree students should submit if completing BS degree F25.
 - Attached proposal
 - Departments need process for how attributes will be handled – when to apply, for what purpose (tracking?)

CHE and ECE will followup after internal discussions in dept. MIE wants to apply attribute as soon as students are accepted into 4+1 program, as early as 2nd semester junior year for tracking purposes, retained through MS graduation. Next meeting we will vote upon college process that we all agree on.

- **Math dept: renumbering MATH 310 to "MATH 218" for Spring 2026.**
include "formerly MATH310, and does not grant credit if taking/taken MATH310" and comment in CRS "a major like ME cannot take MATH310 or MATH 218 AND MATH320 for a math minor" – currently this is listed in Math Minor Requirement only: Effective Summer 2023: Students may not use both MATH 310 and MATH 320 for the mathematics minor. Only one of those two courses may be counted towards the minor requirements.
 - 5/6/25 Contacted Math DUS in Spring 2025; he acknowledged request

➡ COE: review information for all courses articulated to MATH 310/MATH310 NONENG, or, if you want TADA to move forward with updating existing targets from MATH 310 to MATH 218 and removing the MATH310 NONENG alternate articulation?

Miiri to let TADA know: Remove MATH 310 NON ENG alternate articulation so that all students satisfying MATH 310 will receive COE degree credit

➡ If the update is retro-active – meaning that any instance of MATH 310/MATH310 NONENG will be converted and processed as MATH 218 satisfying degree requirements, and (moving forward) wherever MATH 218 is required, an 'old' MATH 310 will successfully land in the requirement.

Miiri to let TADA know: Committee agreed that 'old' MATH 310 will be covered by MATH 218, and any instance of MATH 310/MATH 310NONENG will be converted

➡ Does Engineering need the course renumbering to be approved by college governance (even when there do not appear to be any changes to the learning outcomes)? If so, you can do a single proposal using the short form template

at <https://uofi.app.box.com/s/s174r67b27fhmkjuv6ya1oqttc1a4npo>.

(But a straightforward renumbering of courses **does not** require a proposal at the university level.

Miiri will complete short form for documentation purposes, share with Dana's office.

➡ Prepare a list of all the degrees and minors in Engineering that require MATH 310. If the college needs to send a proposal to your EPC, then you could probably do this in a single proposal. But you have to take into account your own governance processes and the expectations of your faculty.

Depts will email Miiri with list of all courses that require MATH 310

➡ Prepare a list of all the courses in the college by subject (there are 11 subjects in total) that will need prerequisites updates or credit restrictions updated.

Depts will email Miiri with list of all courses that require MATH 310

- ENGR and MENG (Dept. of Engineering Administration)
- ENER, IE, and ME (Dept. of Mechanical and Industrial Engineering)
- BME (Dept. of Biomedical Engineering)
- CS and IT (Dept. of Computer Science)
- CHE (Dept. of Chemical Engineering)
- CME (Dept. of Civil, Materials and Environmental Engineering)
- ECE (Dept. of Electrical and Computer Engineering)

(For example, if you search the Mechanical Engineering (ME) course subject for "MATH 310" it appears twice – ME 328 and ME 347. The college will need to revise these courses to replace MATH 310 with MATH 218 in CRS. So the prerequisite of ME 347 is "Credit in MATH 310" should be changed to "Credit in MATH 310 or MATH 218" or you could also say "Credit in applied linear algebra (MATH 310 or MATH 218)."

➡ Please share these lists with Dana Wright because the changes will likely impact prerequisite checking.

- Carmen requests all 400 and 500-level CRS approvals go to DGS first. Discussed and approved
- Dept DUS want to review all retroactive withdrawals before final College approval. Confirming referring to retroactive **course** drops? This issue may have come up because previous ARC Dir relaxed guidelines too much. EPC decided that we will NOT include departments regarding retroactive COURSE drops, because it is expected that these are granted only for extenuating

circumstances. Miiri to approve all retroactive course drops on behalf of the college and will reach out to departments for input as necessary.

- Representative for Study Abroad College Ambassador Alan was COE rep in Barcelona in May 2025 and would like to share with EPC moving forward. Will plan to include on agenda of upcoming meeting. Also Alan may consider serving as college ambassador. 😊
- Review policy: EPC agree on credit overload process > 18 hrs, Oct 2024:

EPC voted to clarify and update policy to reflect:

- New FYF and Transfer* students: Do not allow > 18 hours EXCEPT for ENGR 100
- Continuing students with a UIC GPA ≥ 3.0 , automatically grant them a credit overload (this would be the majority of petition request)
- Continuing students student with a GPA of 2.0 – 2.9 requires approval of the DUS
- Continuing students with a GPA below 2.0, automatic deny (currently being done)
- Deny all students on term or academic notice

*Transfer = new students from outside COE and non-degree converted to COE degree-seeking students

- COE Process for curriculum revisions – Approved by Carmen and EPC (FYI)
 1. BS programs: Once approved by relevant departments, proposal to be approved by EPC. EPC chair (currently Assoc Dean for UA) notifies Office of Academic Affairs on behalf of COE, cc: DUS of impacted depts
 2. Graduate programs: Once approved by relevant departments, proposal to be approved by DGS Committee. Upon approval, presented to EPC. Once approved, EPC chair (currently Assoc Dean for UA) notifies Office of Academic Affairs on behalf of COE, cc: DGS of impacted depts and Assoc Dean for Graduate Studies
 3. Joint BS/Grad programs: Once approved by relevant departments, proposal to be approved by DGS Committee. Upon approval, presented to EPC. Once approved, EPC chair (currently Assoc Dean for UA) notifies Office of Academic Affairs on behalf of COE, cc: DUS and DGS of impacted depts and Assoc Dean for Graduate Studies
 4. Program documentation stored in EPC folder for academic year of approval

CRS APPROVALS (for 9/22)

1. BME 562 – waiting for crosslist approval ME, going to DGS committee mtg to be presented in EPC on 9/22/25
2. Dept 591 (Coop classes) coming to EPC on 9/22/25, associated program proposal coming to EPC on 10/6 mtg (which needs to be rescheduled)

EPC meeting #2 Fall 2025

Sept 22, 2025

Attendees: Craig Foster, Carmen Lilley, Ataei, Komperda, Kosmach, Kotche, Parde, Wang, Zdunek

Meeting Minutes

CRS APPROVALS

1. ENG 490 Prof Skills **ENGR 490 approved pending addition of "restricted to Grad College"**
2. IE 591 Industrial Eng Internship **approved**
3. ME 591 Internship in Mech Engr **approved**
4. CME 402 Highway Engineering **Miiri modified to include Graduate College in restrictions. Approved.**
5. ECE 591 Internship in ECE **approved pending change, see below, Jim let Miiri know to remove "can be repeated"**
6. CS 218 Data+AI **Miiri checked with Monica Sotos about why course was sent back to COE**
7. BME 590 Internship in Biomed Eng **will be resubmitted after review with DGS**
8. CHE 591 Internship in Chemical Eng **will be resubmitted after review with DGS**
9. CME 591 Engineering Practicum for CME **will be resubmitted after review with DGS**
10. BME 560 (xlist) Photoacoustic Imaging **will be resubmitted after review with DGS**
11. BME 562 (xlist) Biomedical Implants **will be resubmitted after review with DGS**

MAJOR TOPICS

12. EPC meeting #3 – reschedule from 10/6 to 10/13 (same time, 11am)? **Approved**
13. MATH 310 – DUS confirm programs impacted. Will submit to Dana's office. Degree audits will reflect changes to accept MATH 218, but CRS / catalog changes may not be reflected by Spring 2026, so depts may be required to make "exceptions". Please let your staff know this. **Approved, after confirming impact on concentrations in CHE. Submitted to Dana.**
14. Proposal for new degree: MS Structural Engineering (Craig Foster/Hossein Ataei) **Approved by EPC**
15. Proposal to Revise the MCS 2ENG for admissions (Carmen) **Program will accept Business students without Calc I-III, planning a bridge calc course that will not course towards degree. EPC approved.**
16. Proposal to Revise the MENG for coop(Carmen)
 - **All other 590/591 will be presented – ensure 4 credit hours, prereq ENGR 490, limited to Grad College.**

TOPICS FOR UPCOMING MEETINGS (for 10/13)

17. Joint degree program process proposal followup from 9/8 EPC mtg

Departments need process for how attributes will be handled – when to apply, for what purpose (tracking?)

CHE and ECE will followup after internal discussions in dept. MIE wants to apply attribute as soon as students are accepted into 4+1 program, as early as 2nd semester junior year for tracking purposes, retained through MS graduation. Next meeting we will vote upon college process that we all agree on.

18. CS use Short Form for Academic Revision to allow all 400-level courses to be used as Tech Elective

(audits automatically updated) <https://uofi.app.box.com/s/s174r67b27fhmkjuv6ya1oqttc1a4npo>

Miiri sent to Natalie as a request

19. Proposal for new Data Science concentration in Economics

20. Representative for Study Abroad College Ambassador Alan was COE rep in Barcelona in May

2025 and would like to share with EPC moving forward. Will plan to include on agenda of upcoming meeting. Also Alan may consider serving as college ambassador. 😊

EPC meeting #3 Fall 2025

October 13, 2025

Attendees: Ataei, Komperda, Kotche, Lilley, (Tzachrista – for item 1), Wang, Zdunek

Meeting Minutes

MAJOR TOPICS

1. Proposal for new Data Science concentration in Economics (in Documents folder) – approved by EPC. Miiri will communicate to Academic Programs.
2. Proposal to Revise the MS degree track for coop (Carmen)
 - BME 591, CHE 591 approved by EPC pending confirmation language follows MIE/ECE 591 language (which was previously EPC approved)
 - CME 591 – Carmen will visit dept faculty meeting to discuss in further detail, to further discuss fixed 4 credit hour course
 - CS 591 – waiting for CS dept approval
 - Program proposal approved for BME, CHE, ECE and MIE. (CS and CME removed for the time being, to be revisited) – Carmen will send EPC an updated program proposal, Miiri will communicate to Academic Programs.
 - **Update 2/4/26:** CME 590 and CS 591 approved and added so that all programs are included in MS coop track.
3. Joint degree program process proposal follow-up from 9/8 EPC mtg:
Departments need process for how attributes will be handled – when to apply, for what purpose (tracking?)
Depts will use attribute as soon as students are accepted into 4+1 program, as early as 2nd semester junior year for tracking purposes, retained through MS graduation. EPC approved, Miiri will follow up with Jim K re: ECE to ensure agreement of process.
4. Representative for Study Abroad College Ambassador Alan kindly agreed to serve as college rep. He will begin working with Study Abroad office to initiate program articulation review for IES Abroad umbrella programs.
5. Regularly scheduled ABET meeting necessary? Not necessary at this time – Loay is working individually with each dept lead. Will revisit in Spring 2026 if necessary.
6. TA office hours requirement? No college policy. Departments do not have explicit policies, but MIE has several related policies in process.

PENDING

1. CS use Short Form for Academic Revision to allow all 400-level courses to be used as Tech Elective (audits automatically updated) <https://uofi.app.box.com/s/s174r67b27fhmkjuv6ya1oqttc1a4npo>
Miiri sent to Natalie as a request on 9/22, what is current status?

EPC meeting #3 Fall 2025

October 20, 2025

Attendees: Ataei, Komperda (late), Kosmach, Kotche, Parde, Zdunek (late), Wang

Meeting Minutes

CRS TOPICS

1. BME 560 - Photoacoustic Imaging, new course **EPC approved**
2. BME 562 - Biomedical Implants, remove prereqs **EPC approved**
3. CS 218 - Data+AI, EPC approved 3/9/25 after Math 180 prereq confirmed, why back in queue? **EPC already approved but now will not be a GenEd. Miiri to remove GenEd designation in CRS.**
4. CS 591 - Internship in Comp Sci, updated **EPC approved**
5. ME 396 – Senior Design I, update prereqs **EPC approved**

PENDING

1. MATH 218 (MATH 310) – is this ready for Spring 2026? **Miiri verified that MATH 218 will be offered in Spring, Pre-proof not to be shared with students.**
<https://webcs7.osss.uic.edu/schedule-of-classes/pre-proof/schedules/spring-2026/MATH.html>
2. Next meeting scheduled 11/3. Miiri will be out – reschedule or will someone chair the meeting?
Jon K offered to chair meeting on 11/3.
3. CS use Short Form for Academic Revision to allow all 400-level courses to be used as Tech Elective (audits automatically updated) <https://uofi.app.box.com/s/s174r67b27fhmkjuv6ya1oqttc1a4np0>
Miiri sent to Natalie as a request on 9/22, what is current status? **Approved by CS UG committee, up for faculty vote before coming to EPC.**
4. Certificate for AI/ML (C Lilley) **next meeting agenda**
5. **Monday 11am meetings are difficult for Jon. Miiri to request that Natalie Henry find an alternative bi-weekly recurring date.**

EPC meeting #4 Fall 2025
Nov 3, 2025

Meeting Agenda

Quorum: Hossein Ataei (CME), Zhinan Wang (BME), Natalie Parde (CS), Jim Kosmach (ECE), Alan Zdunek (CHE), Jon Komperda (MIE)

MAJOR TOPICS

1. Program revision for CS and DS majors. [Updates to the required courses and options for technical electives for the specified programs, as well as wording changes to clarify departmental requirements.] (in EPC "Documents" folder) (N Parde)
 - a. For the minor in CS, ECE requests the language prohibiting CE majors from the minor be removed.
 - b. Unanimous approval pending the change in (a). 11/3/25
2. Certificate for AI/ML (C Lilley)
 - a. Discussion about necessity to re-vote in EPC.
 - b. We agreed to be safe, we will review and re-approve.
 - c. EPC Reviewed and moved to approve -> Unanimous approval 11/3/25
 - d. Carmen to correct CRS for 400/401/etc since they are still from 2009 (when should be revised).
3. CS 109 discussion of continued need for Matlab per Miiri's conversation with Shanon Reckinger. Change to Python instead of C++, remove Matlab? Also consider that these programs will accept MCS 160 transfer credit to satisfy CS 109.
 - a. BME, CHE, CME ok with no Matlab, full Python
 - b. MIE?
 - i. MIE Requests tabling until faculty vote on 11/6/25 (discussion next EPC or e-mail confirmation)
 - c. Potential next steps – CS department review CRS for CS 109 (in EPC "Documents" folder)
4. Proposal for new joint programs (in EPC "Documents" folder)
 - a. BS BME / MS BioInformatics;
 - b. BS BME / MS BME
 - i. BS BME / MS Biol + BME – Vote on approval
 1. Vote is pending a) verification by Dana that thesis option is allowed in a joint program (and addition of the thesis option catalog statement if allowed). Or
 - b) Dana states thesis is not allowed and references to thesis option are removed. Vote unanimously approved 11/3/25.
 - c. BS BME / Meng;

- i. Table pending discussion between Carmen/Zhinan regarding MEng classes/language/catalog statements. Awaiting proposals in CRS/Minor revision if needed (Speak to Dana/Cari)

- 5. Discussion on the ability of UG students to take MEng courses
 - a. No explicit statement in MEng catalog preventing this.
 - b. Historically not allowed
 - c. BME has statements in catalog allowing electives from MEng
 - d. Need to investigate and either a) MEng catalog statement needs to change, or b) BME needs to remove language allowing certain classes as electives in catalog.
 - e. Catalog change contact (how to do it):

Communications Director
Cari Melby
2180E SSB MC 003

T 312-413-3464
F 312-413-3665
ccmelby@uic.edu

- f. Carmen re-joined meeting
 - i. BME to re-write catalog to state that MEng courses can only be taken if 4+1 accepted.
- 6. Departments are extremely concerned about prerequisite enforcement/checking.
 - a. Departments are requesting all courses have prerequisite checking, during registration, and afterwards. This has not been provided to our departments.
 - b. College is unable to check if students meet prerequisites on courses.

Meeting adjourned @ 12:30pm upon motion to adjourn, and approval

CRS TOPICS

EPC meeting #5 Fall 2025

Nov 17, 2025

Attendees: Ataei, Komperda, Kosmach, Kotche, Lilley (partial), Parde, Wang, Zdunek

Meeting Minutes

CRS TOPICS

1. ENGR 402 – Carmen to verify contact hours, assessment methods, prereq of MENG student, change cross-list, approved pending these changes. Carmen will notify Miiri when changes are updated
2. BME 425 – approved by EPC
3. CME 590 – approved by EPC pending change in “purpose” section from CS to “Dept of CME”
4. CS 472 – approved by EPC, pending Natalie will check if restricted to CS dep, was also recommended that “consent of instructor” is documented

500 level courses need to be approved by DGS committee first: Natalie will check with DGS

5. CS 544 – approved by EPC, pending Natalie will check with instructor if they want to make CRS more broad/less detailed, also map assessments to learning outcomes
6. CS 546 - hold
7. CS 555- hold
8. CS 592- hold

MAJOR TOPICS

1. What do I need to followup re: 11/03/25 EPC meeting?
2. CS 109 – is there any interest in having one intro course CS 111 (Python) – CRS forms in folder
 - a. MATLAB can likely be removed (pending MIE feedback)
 - b. Miiri to share feedback below with Shanon
 - c. MIE dept feels that CS 1 = MCS 160 should satisfy CS 109, not CS 111, but taught in Python
 - d. Depts do want students to learn Python
3. Update prereq check file in main EPC folder:
<https://uofi.box.com/s/tgry7u4pny3bxftfyqh741qkfr4oy63>
4. Interactive curriculum flow chart (Jon K)

EPC meeting #6 Fall 2025

Dec 1, 2025

Attendees: Ataei, Komperda, Kotche, Kosmach, Parde, Wang

Meeting Minutes

MAJOR TOPICS

1. CS 109
 - a. MATLAB can likely be removed (pending MIE feedback)
 - b. Updated CRS forms in folder

Continued discussion regarding keeping MATLAB in CS 109 if CS 111 satisfies degree rqmt.
Jon will follow up after additional discussion with MIE faculty.
2. Update prereq check file in main EPC folder:
<https://uofi.box.com/s/tgry7u4pny3bxftfyqh741qkfr4oy63>
3. Interactive curriculum flow chart (Jon K) **Committee feels this would be a valuable tool for advising. Miiri to work with Jon to hire grad student, Natalie will help identify candidates if possible.**
4. Dual enrollment (BME): UIC allows qualified high school students (junior and senior) to earn college credits toward their BS degree. <https://ohsd.uic.edu/initiatives/early-college-credit-programs/>. The students will enroll in both schools (high school and UIC) while earning college credits. This has been a huge incentive to attract them to UIC in the near future. Students will directly apply to the dual enrollment program and receive UIN, UID.

Currently, campus-wide, we offer only two courses: Introduction to Black Studies and Introduction to Public Health. I was thinking about offering 3h to the summer program students through a BME course. For example, the SHARP! high school research program's content has sufficient breadth and depth to qualify as a 100-200 level BME course. These types of courses will be hidden from the regular college students. Dual enrollment students will not pay tuition fees. The course development and delivery are purely supported by the hosting department or the faculty member.

Dana's office and UIC admission confirmed the idea and walked me through the process of establishing the course. I will connect with Kiely Fletcher to better align with her office's strategy. I was told that more diverse courses from different schools are preferred. Our BME program, as well as engineering in general, will undoubtedly have a lot to offer our future UIC students. This new course could serve as an example and eventually establish a channel to boost enrollment, particularly for highly achieving candidates.

Zhinan shared his proposed plan for summer program. CME and MIE in particular are interested in potential opportunities to expand to dual enrollment with high schools, possibly for their GenEds via hybrid or teaching in high schools.

CRS TOPICS: 500 level courses need to be approved by DGS committee first

1. ENGR 402 – Carmen to verify contact hours, assessment methods, prereq of MENG student, change cross-list, approved pending these changes. Carmen will notify Miiri when changes are updated
2. CS 544 – has it been updated in CRS? approved by EPC, pending Natalie will check with instructor if they want to make CRS more broad/less detailed, also map assessments to learning outcomes
3. CS 546 - hold
4. CS 555- hold
5. CS 592- hold
