UIC Mission to College of Engineering Mission Alignment.docx; 2026-03-13_ChEMission_PEOReview.docx;

Hello colleagues,

In the interest of streamlining the discussion at tomorrow's faculty meeting, I am providing information on the new COE Mission Statement and its connection to our ChE Mission Statement and Program Educational Objectives (PEO's), see attached file. I also included another file showing the College Mission aligned to the UIC mission for completeness.

Since ABET expects our PEOs to be aligned with our dept mission and the college mission, which in turn is aligned with the university mission, each program is expected to engage its constituencies in reviewing and updating, if necessary, their department mission and PEO's to align with the new COE mission.

The ECE department has done some preliminary work updating their department mission statement and PEO's, see attached file.

I also included our current mission statement and PEO's. Take a look and let me know your thoughts at tomorrow's meeting.

Best regards,

Alan

Hello Colleagues,

As a follow up to our discussion at the March 13, 2026 faculty meeting, please provide feedback by next **Friday April 3rd** on the revisions that I made to the ChE Mission Statement to align with the new College of Engineering Mission Statement.

Please click on the link to access the ChE Mission Statement Survey: <https://forms.gle/VoiQuJiuUSjiEMXK9>

Thanks for your time and help on this.

Best,

Alan

ChE Mission Statement Survey

Hello colleagues; As a follow up to our discussion at the March 13, 2026 faculty meeting, please provide feedback by **Friday April 3rd** on the following revisions to the ChE Mission Statement to align with the new College of Engineering Mission Statement.

Once we have agreement, I will send another survey to re-align our Program Educational Objectives to the new ChE Mission Statement.

Old COE Mission Statement:

UIC

Engineering's mission is access to excellence and success. We educate students to innovate and to lead. We expand global knowledge of the engineering field through excellence in original research. In addition, as a public institution we prioritize our relationship with the city of Chicago and the state of Illinois. We foster strong local partnerships, provide crucial engineering expertise and facilities, and serve as a major economic driver for the region.

New College of Engineering Mission Statement:

"Through

our commitment to excellence, accessible education and impactful research, we prepare curious, proficient and diverse engineers and computer scientists to lead and advance upward mobility locally and globally."

Current Chemical Engineering Mission Statement:

"The mission of the Department of Chemical Engineering is to serve society through excellence in education, research, and public service. We provide for our students an education in chemical engineering, and we aspire to instill in them the attitudes, values, and vision that will prepare them for lifetimes of continued learning and leadership in their chosen careers. Through scholarship, the Department strives to generate new knowledge and technology for the benefit of the State of Illinois, the nation, and beyond."

New Chemical Engineering Mission Statement Draft (changes underlined):

"The Department of Chemical Engineering is committed to serve society through excellence, accessible education, research, and public service. We prepare diverse and proficient chemical engineers to innovate, lead and advance engineering practice and technologies.

We aspire to instill in them the attitudes, values, and vision that will prepare them for lifetimes of continued learning and leadership in their chosen careers. Through scholarship, the Department strives to generate new knowledge and technology that strengthens upward mobility and benefits the local and global economy.

Please evaluate the new Chemical Engineering Mission Statement: 1- Needs changes, 2- No changes needed. If you choose 1, please provide feedback in the Additional Comments.

Thank you in advance for your time.

ChE Mission Statement

From Chemical Faculty Listserv <CHE-FACULTY@LISTSERV.UIC.EDU>
on behalf of
Zdunek, Alan <zdunek@uic.edu>
Date Tue 4/21/2026 4:45 PM
To CHE-FACULTY@LISTSERV.UIC.EDU <CHE-FACULTY@LISTSERV.UIC.EDU>

Dear Colleagues,

Following our recent discussion on the department's mission statement, I revisited the wording in light of the realignment in the College of Engineering and UIC mission. See the table below.

The UIC mission emphasizes “broadest access,” and the College has adopted language that reflects this commitment. To maintain alignment while preserving the intent of our original statement, Vikas and I propose a minimal modification:

“The mission of the Department of Chemical Engineering is to deliver an outstanding education with broad access, to a diverse student body.”

This change adds only the phrase “with broad access” and is intended to reflect our existing commitment to providing pathways to a rigorous and high-quality education, without altering standards or expectations.

We believe this wording maintains the spirit of what was discussed and voted on, while ensuring consistency with College and University language.

Please let me know if you have any concerns.

Best regards,

Alan

UIC Mission

“UIC’s mission is to provide **the broadest access** to the highest levels of educational, research, and clinical excellence.”

College of Engineering Mission

“Through our commitment to excellence, **accessible education** and impactful research, we prepare curious, proficient and diverse engineers and computer scientists to lead and advance upward mobility locally and globally.”

UIC Mission to College of Engineering Mission Alignment Table

UIC Mission Component	College of Engineering Mission Element	Nature of Alignment
Broadest access	Accessible education	The College directly operationalizes UIC's access commitment by ensuring inclusive pathways into engineering and computing education.
Educational excellence	Commitment to excellence; prepare proficient engineers and computer scientists	The College advances institutional educational excellence through rigorous curricula, high academic standards, and strong student learning outcomes.
Research excellence	Impactful research	The College contributes to UIC's research mission by conducting high-impact engineering and computing research that addresses societal and technological challenges.
Clinical and societal excellence	Advance technological solutions that improve lives	Engineering innovations in health, infrastructure, computing, and sustainability support UIC's broader societal and public impact mission.
Institutional excellence at the highest level	Excellence in education and research	The College reinforces UIC's aspiration for top-tier performance through continuous improvement, innovation, and measurable impact.
Public mission and upward mobility	Advance upward mobility locally and globally	The College translates UIC's public urban mission into workforce development, economic mobility, and leadership preparation in Chicago and beyond.

Hi Vikas,

Yes, 'with broad access' does sound better, is clearer and more aligned with the UIC mission statement words.

Can you draft a note to the faculty, that would help.

Thanks,

Alan

Hi Alan,

Thanks for sharing this and for looking into the College alignment carefully.

I think it would be beneficial to include "accessible education," particularly given the linkage between the UIC and College missions. That said, I also understand the faculty concern and that their hesitation is less about the intent and more about how the wording may be interpreted. It may help to frame "accessible" not as lowering standards, but as broadening pathways to a rigorous and high-quality education, which is already consistent with what we do as a department. If we communicate that clearly, I believe we can bring the faculty along.

Perhaps the best approach is to revisit this with a short explanation of the alignment and intent, and position it as a clarification rather than a reversal of the vote.

Let me know if you'd like, I can help draft a note to the faculty for you?

Best,
Vikas

To: Berry, Vikas <vikasb@uic.edu>
Subject: Need your advise on ChE Mission Statement

Hi Vikas,

I was checking my files from Lo'Ay Abu Salah on the COE Mission statement realignment to the UIC Mission.

The UIC Mission has the component "Broadest access" where the COE element is 'Accessible education', with the nature of the COE alignment as:

"The College directly operationalizes UIC's access commitment by ensuring inclusive pathways into engineering and computing education."

Based on this, Should we go back to:

The mission of the Department of Chemical Engineering is to deliver an outstanding and accessible education to a diverse student body"

Or leave it as we voted:

"The mission of the Department of Chemical Engineering is to deliver an outstanding education to a diverse student body"

Here is Lo'Ay's document:

UIC Mission

"UIC's mission is to provide the broadest access to the highest levels of educational, research, and clinical excellence."

College of Engineering Mission

"Through our commitment to excellence, accessible education and impactful research, we prepare curious, proficient and diverse engineers and computer scientists to lead and advance upward mobility locally and globally."

The College of Engineering mission directly supports and operationalizes the UIC mission by advancing broad access through accessible engineering education, strengthening institutional excellence through rigorous academic and research programs, and contributing to societal and economic mobility through impactful technological innovation locally and globally.

UIC Mission to College of Engineering Mission Alignment Table

UIC Mission Component	College of Engineering Mission Element	Nature of Alignment
Broadest access	Accessible education	The College directly operationalizes UIC's access commitment by ensuring inclusive pathways into engineering and computing education.
Educational excellence	Commitment to excellence; prepare proficient engineers and computer scientists	The College advances institutional educational excellence through rigorous curricula, high academic standards, and strong student learning outcomes.
Research excellence	Impactful research	The College contributes to UIC's research mission by conducting high-impact engineering and computing research that addresses societal and technological challenges.

Clinical and societal excellence	Advance technological solutions that improve lives	Engineering innovations in health, infrastructure, computing, and sustainability support UIC's broader societal and public impact mission.
Institutional excellence at the highest level	Excellence in education and research	The College reinforces UIC's aspiration for top-tier performance through continuous improvement, innovation, and measurable impact.
Public mission and upward mobility	Advance upward mobility locally and globally	The College translates UIC's public urban mission into workforce development, economic mobility, and leadership preparation in Chicago and beyond.

Thanks,

Alan

ChE Mission Statement- some more edits

From Zdunek, Alan <zdunek@uic.edu>

Date Mon 4/6/2026 3:12 PM

To Caracotsios, Michael <mcaracot@uic.edu>; Singh, Meenesh R <mrsingh@uic.edu>

Hi Michael and Meenesh,

You have been a big help and provided excellent suggestions to improve our ChE Mission Statement. Thank you!

I incorporated your suggestions into the version below. Let me know your thoughts before I send it to the rest of the faculty.

Since we ultimately need to connect our Program Educational Objectives to our mission, and our mission to the College mission, I included them below.

College of Engineering Mission

“Through our commitment to excellence, accessible education and impactful research, we prepare curious, proficient and diverse engineers and computer scientists to lead and advance upward mobility locally and globally.”

Revised Chemical Engineering Department Mission

The mission of the Department of Chemical Engineering is to provide an outstanding, accessible education for a diverse group of students. We prepare proficient engineers to advance fundamental and applied research, to innovate and lead transformative technological solutions that strengthen economic mobility and contribute to both the local and global economy.

Current CHE Program Educational Objectives (PEO's):

PEO	Category	Description
1	Depth	In engineering practice, advanced study or original research, UIC Chemical Engineering bachelor's degree graduates will be effective in applying fundamental principles, scientific knowledge, rigorous analysis, creative design, and conceptual innovation.
2	Breadth	Based upon mastery of engineering in a broad, societal context, UIC Chemical Engineering graduates will have successful careers in the public or private sectors, or in the pursuit of graduate education.
3	Professionalism and Service	In the service of industry, government, the engineering profession and society at large, graduates will function effectively in the complex modern work environment with clear communication, responsible teamwork, and high

		standards of ethics, professionalism, safety and protection of the environment.
4 Life-	Long Learning and Leadership	Based upon a rigorous undergraduate program that is innovative, challenging, open and supportive, graduates will enhance their skills and knowledge through life-long learning and demonstrate professional leadership.

Best regards,

Alan

Hi Michael,

Thanks for the comments. Here is another version, let me know what you think. I wanted to keep the 'upward mobility and local/global economy' in the mission to align with the COE statement.

"The Department of Chemical Engineering is committed to excellence in accessible education, research, and public service. We prepare diverse and proficient chemical engineers to innovate, lead and advance engineering practice and technologies through a lifetime of continued learning and leadership that strengthens upward mobility and benefits the local and global economy.

Alan

Alan,

I would replace "for lifetimes" with "**for a lifetime**" (I don't think anyone has more than one lifetime 😊)
Also personally I would strike the last sentence that begins with "Through scholarship..." I think it sounds kind of weird and as it is our mission statement is already long.

Best Regards

Michael

Subject: ChE Mission Statement Survey- Please complete by Friday April 3rd.

Hello Colleagues,

As a follow up to our discussion at the March 13, 2026 faculty meeting, please provide feedback by next **Friday April 3rd** on the revisions that I made to the ChE Mission Statement to align with the new College of Engineering Mission Statement.

Please click on the link to access the ChE Mission Statement Survey: <https://forms.gle/VoiQuJiuUSjiEMXK9>

Thanks for your time and help on this.

Best,

Alan
