

EPC meeting #1 Fall 2021
Friday, 8/20/2021, 10am-12pm

Join Zoom Meeting

<https://uic.zoom.us/j/82983069458?pwd=U2tRQTNFbUV4cU05NERnSnJ0amtBdz09>

Meeting ID: 829 8306 9458
Passcode: w54t4E27

Meeting Minutes

CRS submissions:

- ECE 431: Analog Communic Circuits – **deleted old course from CRS**
- IE 118: Energy for a sustainable society (GedEd planned) Houshang will reach out to Earth / Envr Science dept, ref related class ChE 150 in CRS, update title, inform dept to anticipate high interest. EPC approved upon pending changes

Dept approval pending **Will continue to revisit entries that should be updated or deleted, etc. in CRS**

- CS 398, 489
- ECE 115
- IE 596 – Indep Study
- ME 503, 516, 596
- MENG (6 courses from 2016)

Outstanding **Will continue to revisit entries that should be updated or deleted, etc. in CRS**

- BME 475 – cross list pending with BIOS
- BME 479: Wearables Tech Lab – **Was CS prereq added - update CRS prereq with BIOE 240 or CS 211/261.**
- BME 538: new course, “numerical analysis” Course language to be revised to emphasize BME applications. **Tbd**
- IE 201: Financial Engineering – **removed from CRS**

Other Topics for discussion:

- Update prereqs CHEM 112: CHE 101, CME 260, CME 261, CME 322, ECE 347, ME 261. Can DUGS review prereqs for their courses since we have moved to automated prereq checking?
 - CS 401 prerequisite needs to be updated
- Courses allowed to satisfy both concentration in major as well as a GenEd? (ECON 120 in CHE, for example) **BME and CS shared current policies in their curricula. BME/CS – cannot use a course to satisfy both CAE/technical electives and GenEd. However, ChE concentrations require >128 credit hours, so in this instance it was voted and approved that ECON 120 can satisfy GenEd and concentration rqmts. It was noted that for courses satisfying multiple requirements, ABET needs to see separate assessments for Program objectives.**
- Honors Capstone project – using senior design projects (see draft guidance document from Ludwig): **Lengthy discussion about HC requiring excessive extra deliverables, primarily not in favor of proposal. Miiri to touch base with Sr Design instructors, and will bring back discussion to EPC at some point.**
- IE 118 High school COE GenEd class for credit – (and fee?) – Houshang **not EPC related, but after course is fully approved as GenEd, can share details**
- COE Student Org fair 9/8 outside of Makerspace, 12-4pm
- Fall 2021 EPC meetings – zoom, in person, alternating? **TBD**

EPC meeting #2 Fall 2021

Friday, 9/17/2021, 10am-11am

Attendees: Atei, Devroye, Hetling, Kotche, Troy, Zdunek

Meeting Minutes

Previous CRS submissions

- IE 118: Energy for a sustainable society - MIE updated title but reference to similar course CHE 150 was going to be included, Miiri can update but needs language
- BME 475 – cross list pending with BIOS, update to BME rubric EPC voted to approve, College of LAS must approve before COE can approve
- BME 479: Wearables Tech Lab crosslist with CS approved by DGS, EPC voted to approve
- BME 538: new course, "numerical analysis" Course language to be revised to emphasize BME applications. Modifications and updates made per previous recommendation of EPC committee, approved by EPC
- ENGR 289 & 489: update to class in 4/20, Miiri to check with Jim
- IDS/IPD courses – old courses, Miiri checking with Houshang about status awaiting feedback from Prof Scott and Prof Li
- MENG courses – old courses, Miiri checking with Dr. Uslenghi awaiting feedback from Prof Uslenghi

Other Topics discussed:

- Verify - DUGS confirm prereqs for courses as we move to automated prereq checking? DUGs will make any updates as needed in anticipation of automated checking
- iAdvise: this semester rollout of iAdvise for all faculty. Accounts created for all faculty, DUGS and/or Miiri to announce to faculty with support resources and instructions similar to what we used in pilot last Spr 2021. Miiri to communicate iAdvise migration to faculty, DUGs will reinforce within depts, short video, details about advising process using iAdvise necessary for faculty adoption. Details about use of notes, FERPA, as well as communication to dept advising staff necessary. No need for training meetings at College level but some depts will have brief meetings to introduce. In order to maintain consistency across depts, faculty advising evaluations will be managed in depts. UGA office will share existing Qualtrics survey with ECE, CHE and MIE to be modified and adopted. Thank you, DUGs!
- MENG program – what is EPC involvement in program modifications? How much engagement does EPC have with graduate programs in collab with DGSs?
- Discussed COE awards committee and possible establishment of undergraduate research award

EPC meeting #3 Fall 2021

Friday, 10/15/2021, 9am-10am

Present: Atai, Darabi, Devroye, Hetling, Kotche, Troy, Zdunek

Meeting Minutes

Previous CRS submissions

- BME 462: Intro to Dental Sci and Tech **change title: Introduction to Dental Clinical Research and Technology "Dental Clinical Res and Tech"; EPC approved pending title change**
- CS 489: Human Augmentics **Update to reflect BME prereq "CS 251 or BME 332", reference potential overlap with newly approved BME Wearables class, modify reason for request. Will revisit in Nov meeting. Note BME 332 awaits approval in SCEP, formerly BIOE 430**
- IDS 571: old course cross list approval, **awaiting feedback from Houshang/Prof Li**

Other Topics:

- Karen Finder (+ Dana Wright) – **update catalog to remove courses that should no longer be offered every 3 years, not sure this actually is happening. DGS present to faculty for approval and then comes to EPC for removal. Miiri to convey to Carmen Lilley**
- iAdvise rollout! **DUGs would like to find a way to connect advising / lifting of course registration hold / advisor evaluations.**
- CS 100
 - The course description still indicates says that students cannot receive credit for CS 100 is they have credit for CS 101 or MCS 260. CS 101 is the old CS 111 equivalent course so at minimum this needs to be updated to CS 111 instead of CS 101. **Request Pat to update course description.**
 - The description also indicates that CS and ECE majors cannot use it towards graduation credit but implies that other majors will. Do the other Departments (Bioe, ChE, CME, MIE) want to accept CS 100 for free elective credit / outside rubric credit or do they want to consider it a remedial course and award no credit...similar to how a Math 121 course would be looked at compared to Math 180. If it is a remedial course, the course description should be updated to indicate that no graduation credit for COE majors. **CS 100 not accepted for free elective in any COE dept as it is considered remedial. Request Pat to update course description.**
 - Students take the AP CS exam in High school and some of them receive credit for CS 100 and they are now asking to use it as free elective / outside major rubric credit. Historically, we have denied these requests citing that the course is remedial for COE students compared to CS 107, CS 109, CS 111 course already required for the degree. **See above.**
- OPT / CPT – optional practical/curricular training “integral” part of established curriculum for international students
 - CPT – internship, coop – must be registered in academic program, either earned credit or degree requirement
 - <https://www.ois.uic.edu/common/pages/DisplayFile.aspx?itemId=1573894>
 - https://www.ois.uic.edu/students/current/f-1_student_employment/
 - **Tabled for discussion in Nov 2021 EPC meeting.**

EPC meeting #4 Fall 2021

Friday, 11/19/2021, 10am-11am

Attendees: Ataei, Coppola-Conroy, Darabi, Devroye, Hetling, Kotche, Zdunek

Meeting Minutes

CRS submissions

- CS 402 No CS at EPC meeting; postponed until Jan.
- ME 503 – unanimously voted to approve
- CS 489: Human Augmentics will approve with prereq “CS 251 or consent”

Other Topics:

- CPT for international students– Rose Coppola-Conway
Significant constraints to introduce a required course in undergrad curricula. Miiri to schedule a followup meeting to discuss further implications.
- How did Fall 2021 advising go? MIE receiving less advising evals, long term desire to improve advising functionality with improved information available to faculty, EPC decided to schedule standalone meeting to discuss.
- Minor in Math:
The Minor in Mathematics is comprised of MATH 180 Calculus I, MATH 181 Calculus II, MATH 210 Calculus III, and three MATH, MCS, or STAT electives at the 200-level or above. All College of Engineering degrees require the three calculus courses, and as a general rule, at least one of the minor electives can be satisfied by a course that is also in the major. In some cases, all three minor electives can be covered by major requirements. The College of Engineering believes that, in order to earn the minor, students should have exposure to math coursework that goes beyond that which is subsumed by the student's major, and as such expects students to **complete two courses for the minor that go beyond what is required in their major**. The Department of Mathematics, Statistics, and Computer Science proposes adding language to this effect to the undergraduate catalog in order to address Engineering's concerns and make clear this expectation to students.
Committee members desire to optimize opportunities for math minors, satisfy minimal requirements. However, current Math policy is below. Math dept wants to add above language to course catalog clarifying this policy.
<https://mscs.uic.edu/undergraduate/minors/>
- Natasha: “credit is not given” phrasing in for example ECE 266 “Course Information: Credit is not given for ECE 266 if the student has credit in CS 261” and what that means for students working towards a minor. As an example, should the student take both ECE 266 (needed for minor) AND CS 261 (needed for major) or should we substitute one for the other? Will revisit in next EPC meeting when CS is represented. Houshang shared that similar situation with Thermodynamics in CME and MIE; requires students to take both courses for minor due to small but important differences in courses.
- MENG courses approval: with unanimous approval from DGS, we can approve via email, else will address in Jan meeting. Committee accepts this proposal.
-
- GPPA: For F22 cycle, proposal to modify the Conditions of Acceptance to include a clause that states that students need to identify a faculty member who is willing to support them BEFORE they take the seat in PhD program. This means that the student would need to work on building a relationship during the UG years. If there is no faculty relationship, the seat gets rescinded. After F22, GPPA will accept MS students only. Committee accepts this proposal.
- CS 100 No CS at EPC meeting; postponed until Jan.
 - The course description still indicates says that students cannot receive credit for CS 100 is they have credit for CS 101 or MCS 260. CS 101 is the old CS 111 equivalent course so at minimum this needs to be updated to CS 111 instead of CS 101. Request Pat to update course description.

- The description also indicates that CS and ECE majors cannot use it towards graduation credit but implies that other majors will. Do the other Departments (Bioe, ChE, CME, MIE) want to accept CS 100 for free elective credit / outside rubric credit or do they want to consider it a remedial course and award no credit...similar to how a Math 121 course would be looked at compared to Math 180. If it is a remedial course, the course description should be updated to indicate that no graduation credit for COE majors. **CS 100 not accepted for free elective in any COE dept as it is considered remedial. Request Pat to update course description.**
- Students take the AP CS exam in High school and some of them receive credit for CS 100 and they are now asking to use it as free elective / outside major rubric credit. Historically, we have denied these requests citing that the course is remedial for COE students compared to CS 107, CS 109, CS 111 course already required for the degree. **See above.**

EPC meeting #1 Spring 2022

Friday, 1/14/22, 11am-12pm

Present: Ataei, Darabi, Devroye, Hetling, Kotche, Troy, Zdunek

Meeting Minutes

- **Miiri to find alternative date for monthly EPC meeting in spring 2022.**

CRS submissions

- **CS 402 – voted to unanimously approve**
- **CME 515 – recommendations to reference Data Science major, add major specific topics into description to differentiate from CS and other data science courses. Will review again in subsequent EPC meeting**
- **CME 538 – remove detail about grading structure and operational aspects of the course. Voted unanimously to approve pending changes. Hossein to notify Miiri when changes have been made.**
- **CME 573: remove detail about grading structure and operational aspects of the course. Voted unanimously to approve pending changes. Hossein to notify Miiri when changes have been made.**

Other Topics:

- **CPT for international students**
Miiri to bring answers to several questions posed by EPC and send proposal of next steps to committee.
 1. **Does the class that is created have to have a single instructor assigned, or can it be like our research classes, where a student registers for the class under a particular faculty member/advisor?**
 2. **Can it be 0 credit hours? If not, can we have it be 1 credit hour and repeatable? We are planning on developing a 300-level course.**
 3. **If the class does not count towards degree requirements, can we keep it under the ENGR rubric, or must it be separate for each dept? It would not require a program change if it does not count toward degree requirements for ABET purposes?**
 4. **If it cannot remain under the ENGR rubric, can we cross-list across all 6 depts to have a single faculty member assigned as instructor?**
 5. **Has there been discussions on how this would impact instructor courseload to manage these students? Related, are there deliverable requirements from OIS' perspective? Final report, feedback from intern company supervisor? I'm advising a grad student now who is doing a COOP using BME 590 and I am requesting a summary report and a statement of satisfactory work from her work supervisor at the end of the term.**
- **Natasha: "credit is not given" phrasing in for example ECE 266 "Course Information: Credit is not given for ECE 266 if the student has credit in CS 261" and what that means for students working towards a minor. As an example, should the student take both ECE 266 (needed for minor) AND CS 261 (needed for major) or should we substitute one for the other? Must take the course for minor but substitutions can be made for major requirements.**

- CS 100 **Pat will review and address catalog changes.**
 - The course description still indicates says that students cannot receive credit for CS 100 is they have credit for CS 101 or MCS 260. CS 101 is the old CS 111 equivalent course so at minimum this needs to be updated to CS 111 instead of CS 101. **Request Pat to update course description.**
 - The description also indicates that CS and ECE majors cannot use it towards graduation credit but implies that other majors will. Do the other Departments (Bioe, ChE, CME, MIE) want to accept CS 100 for free elective credit / outside rubric credit or do they want to consider it a remedial course and award no credit...similar to how a Math 121 course would be looked at compared to Math 180. If it is a remedial course, the course description should be updated to indicate that no graduation credit for COE majors. **CS 100 not accepted for free elective in any COE dept as it is considered remedial. Request Pat to update course description.**
 - Students take the AP CS exam in High school and some of them receive credit for CS 100 and they are now asking to use it as free elective / outside major rubric credit. Historically, we have denied these requests citing that the course is remedial for COE students compared to CS 107, CS 109, CS 111 course already required for the degree. **See above.**
- Fall 2021 advising: **Will schedule a followup meeting in early Feb.**

EPC meeting #2 Spring 2022

Friday, 2/11/22, 11am-12pm

Present: Ataei, Darabi, Devroye, Hetling, Kotche, Troy, Zdunek

Meeting Minutes

CRS submissions

- BME 430 – **John will add detail about learning outcome assessments, typo Outcome #4, unanimous vote to approve pending changes. John notify Miiri when updated in CRS.**
- BME 595 – **unanimous vote to approve**
- CME 515 – **removed from CRS based on dept preference**
- CME 538 – **Hossein updated per EPC recommendations, COE approval 2/11**
- CME 573 – **Hossein updated per EPC recommendations, COE approval 2/11**

Other Topics:

- Alignment of CRS course detail with syllabus
 - Discussed need for instructors to see approved courses in CRS
 - **DUGs agreed to have CRS forms sent to instructors of record for Fall 2022 classes, with a request to ensure that syllabi align with learning outcomes, etc.**
 - **Miiri to bring to Pete's attention; request for college-level communication to faculty about importance (ABET and faculty governance)**
- **CPT for international students**
 - Miiri met with OIS Megan Ward on 2/10 and she reviewed BME 300 draft and found it appropriate for CPT; COE will use this as template
 - DGS (except JH) are preparing 590 or other 500-level course (BME/CS) for graduate internship, based on existing BME 590 course. **Miiri to send CRS entry for BME 590 to Natasha.**
 - **DUGs agreed to use draft BME 300 as template for 390 course for each dept, submitted in CRS by 2/15/22.**
 - **CS/BME can be repeated up to 3 times for credit; all other departments only 1 credit used for graduation.**
 - **Courses will be restricted to students in dept only.**
 - **Given time-sensitivity, DGS agreed to discuss, review and approve all 11 courses (6 UG, 5 G) via email with high priority.**

- Per Carmen, Dana Wright's office will expedite approval and catalog listing.
- CS 100 **Pat will review and address catalog changes.**
 - The course description still indicates says that students cannot receive credit for CS 100 is they have credit for CS 101 or MCS 260. CS 101 is the old CS 111 equivalent course so at minimum this needs to be updated to CS 111 instead of CS 101. **Request Pat to update course description.**
 - The description also indicates that CS and ECE majors cannot use it towards graduation credit but implies that other majors will. Do the other Departments (BME, ChE, CME, MIE) want to accept CS 100 for free elective credit / outside rubric credit or do they want to consider it a remedial course and award no credit...similar to how a Math 121 course would be looked at compared to Math 180. If it is a remedial course, the course description should be updated to indicate that no graduation credit for COE majors. **CS 100 not accepted for free elective in any COE dept as it is considered remedial. Request Pat to update course description.**
 - Students take the AP CS exam in High school and some of them receive credit for CS 100 and they are now asking to use it as free elective / outside major rubric credit. Historically, we have denied these requests citing that the course is remedial for COE students compared to CS 107, CS 109, CS 111 course already required for the degree. **See above.**

EPC meeting #3 Spring 2022

Friday, 3/18/22, 10-11am

Attendees: Ataei, Darabi, Devroye, Hetling, Kotche, Troy, Zdunek

Meeting Minutes

CRS

- BME 568 Optical Imaging Journal Club (Hetling) – **John will modify CRS to reflect limits on repeated credit per dept preferences. EPC unanimously voted to approve pending this change.**
 - BME 586 Computational Cell Biology (Hetling) – **John will modify CRS to reflect exam time in Major Topics section. EPC unanimously voted to approve pending this change.**
 - CHE 330- Pre-requisite change. (Zdunek) - **EPC unanimously voted to approve**
 - ECE 115 (Devroye)- **EPC unanimously voted to approve**
-

Other Topics:

- CS 109 – **Pat discussed ACCC limits for MATLAB on personal machines and proposed use of Python at home; CHE/BME/MIE cannot use Python as a substitution in the short term (need MATLAB Controls Toolbox). Also ECE needs MATLAB for their curriculum. Pat will bring this feedback to CS/ACCC to identify potential solutions.**
- BS/MS joint degree (Devroye) – **CHE and CS have joint degree programs, currently working through process to manage FAFSA and other issues with Jim Muench. Natasha would like to be included in these discussions. BME has “accelerated” BS/MS program but not formalized with shared BS/MS hours.**
- CPT courses status – **391 courses available in BANNER, 591 courses will be ready for when registration opens**
- CHE 396: (Zdunek) – due to CHEM 232/234 credit hour changes: “Introduction to modern, process design and development, engineering economics, and report writing. Design and cost

of equipment relating to materials handling to heat transfer, mass transfer, and reactors. **Continuing students will take the course for 4 hours and students entering after Fall 2020 will take the course for 3 hours."** **EPC approved catalog change.**

- Is the College is considering any financial help or expedited admissions for Ukrainian students? (Devroye) **Miiri shared recent information from Admissions Office**
<https://admissions.uic.edu/information-students-displaced-conflict-ukraine>
- CS 100 **Pat will review and address catalog changes, aiming for April meeting.**
 - The course description still indicates says that students cannot receive credit for CS 100 is they have credit for CS 101 or MCS 260. CS 101 is the old CS 111 equivalent course so at minimum this needs to be updated to CS 111 instead of CS 101. **Request Pat to update course description.**
 - The description also indicates that CS and ECE majors cannot use it towards graduation credit but implies that other majors will. Do the other Departments (Bioe, ChE, CME, MIE) want to accept CS 100 for free elective credit / outside rubric credit or do they want to consider it a remedial course and award no credit...similar to how a Math 121 course would be looked at compared to Math 180. If it is a remedial course, the course description should be updated to indicate that no graduation credit for COE majors. **CS 100 not accepted for free elective in any COE dept as it is considered remedial. Request Pat to update course description.**
 - Students take the AP CS exam in High school and some of them receive credit for CS 100 and they are now asking to use it as free elective / outside major rubric credit. Historically, we have denied these requests citing that the course is remedial for COE students compared to CS 107, CS 109, CS 111 course already required for the degree. **See above.**

EPC meeting #4 Spring 2022

Friday, 4/15

Attendees: Ataei, Darabi, Devroye, Hetling, Kotche, Troy, Zdunek

Meeting Minutes

CRS

- CME 111 CME dept will revise submission to more closely connect GenEd outcomes/assessments to course outcomes/assessments. Committee provided feedback to consider – English prereq, removal of math calculations or additional detail.

Other Topics:

- COE overview – orientation dates, dept support? Miiri will circle back with specific date requests at end of semester.
- CS 100 Discussion about CS 100 preventing CS 111, non majors cannot become CS majors as written. Pat will review and address catalog changes, aiming for May meeting.
 - The course description still indicates says that students cannot receive credit for CS 100 is they have credit for CS 101 or MCS 260. CS 101 is the old CS 111 equivalent course so at minimum this needs to be updated to CS 111 instead of CS 101. Request Pat to update course description.
 - The description also indicates that CS and ECE majors cannot use it towards graduation credit but implies that other majors will. Do the other Departments (Bioe, ChE, CME, MIE) want to accept CS 100 for free elective credit / outside rubric credit or do they want to consider it a remedial course and award no credit...similar to how a Math 121 course would be looked at compared to Math 180. If it is a remedial course, the course description should be updated to indicate that no graduation credit for COE majors. CS 100 not accepted for free elective in any COE dept as it is considered remedial. Request Pat to update course description.
 - Students take the AP CS exam in High school and some of them receive credit for CS 100 and they are now asking to use it as free elective / outside major rubric credit. Historically, we have denied these requests citing that the course is remedial for COE students compared to CS 107, CS 109, CS 111 course already required for the degree. See above.
 - EXPO next Friday
 - Interdisciplinary senior design with Continental, industry partner, for ECE and MIE dept. Discussed whether a need exists to create a new ENGR course to accommodate or not. Miiri will ask Matt Alonso to meet with Natasha and Houshang to discuss further.
 - COE Student advisory committee Natasha shared how ECE selects and uses a student advisory committee. Invite by general email request, about 20 students volunteered, 10 showed up. Another option is a Town Hall?

EPC meeting #5 Spring 2022

Tuesday, 5/10

Attendees: Devroye, Darabi, Hetling, Kotche, Troy, Zdunek

Absent: Ataei

Meeting Agenda

CRS

- CME 111: *The Art of Structural Form* Committee recommended remove exam hours in Major Topics, or reduce to 1 for midterm – reflect 45 total contact hours. Unanimously approved by EPC pending these changes. Miiri to connect with Hossein on this course.
- CME 322: *Environmental Engineering*: prereq change unanimously approved by EPC
- ECE 311: prereq change unanimously approved by EPC
- ECE 347: prereq change unanimously approved by EPC
- ECE 415: prereq change unanimously approved by EPC
- ECE 424: updating course title and topics: Natasha will update learning outcomes, major topics, number of hours, transcript title to "RF and Microwave". Revisit in subsequent EPC meeting.
- ECE 466: Change title and description, needs CS approval for cross-listing unanimously approved by EPC, but requires CS approval first.

Other Topics:

- CS+ Design program unanimously approved by EPC
- EPC committee confirmed that approval for any changes to curriculum flow diagram does not require EPC approval
- Miiri will schedule next meeting within first month of Fall 2022 semester. New DUGs for several departments! Sad!
- CS 100 This will remain on agenda until resolved...
 - Discussion about CS 100 preventing CS 111, non majors cannot become CS majors as written. Pat will review and address catalog changes, aiming for May meeting.
 - The course description still indicates says that students cannot receive credit for CS 100 is they have credit for CS 101 or MCS 260. CS 101 is the old CS 111 equivalent course so at minimum this needs to be updated to CS 111 instead of CS 101. Request Pat to update course description.
 - The description also indicates that CS and ECE majors cannot use it towards graduation credit but implies that other majors will. Do the other Departments (Bioe, ChE, CME, MIE) want to accept CS 100 for free elective credit / outside rubric credit or do they want to consider it a remedial course and award no credit...similar to how a Math 121 course would be looked at compared to Math 180. If it is a remedial course, the course description should be updated to indicate that no graduation credit for COE majors. CS 100 not accepted for free elective in any COE dept as it is considered remedial. Request Pat to update course description.
 - Students take the AP CS exam in High school and some of them receive credit for CS 100 and they are now asking to use it as free elective / outside major rubric credit. Historically, we have denied these requests citing that the course is remedial for COE students compared to CS 107, CS 109, CS 111 course already required for the degree. See above.
